| 17 | I. <u>INTRODUCTION</u> | | |
| 18 | Plaintiffs submit this supplemental mem | orandum in further support of Plaintiffs' Second | |
| 19 | Motion to Sanction, filed February 28, 2023. T | his supplemental memorandum discusses | |
| 20 | bombshell evidence relating to the cause of the | Labor Day 2020 fires that Plaintiffs learned | |
| 21 | through third-party discovery on April 5, 2023: PacifiCorp was advised by the State of Oregon | | |
| 22 | on Labor Day 2020 to shut off the power in its s | service territory west of the Cascades to prevent | |
| 23 | fires. This evidence was not disclosed by Pacifi | iCorp during discovery. | |
| 24 | | | |

PAGE 1 - PLAINTIFFS' SUPPLEMENTAL MEMORANDUM IN SUPPORT OF PLAINTIFFS' SECOND MOTION TO SANCTION

25

| Third-party witness Doug Grafe testified at a deposition initiated in related litigation on |
|---|
| April 5, 2023. Grafe was the Oregon Department of Forestry ("ODF") Chief of Fire Protection |
| on Labor Day 2020. Grafe Tr. at 9:10-13. Key excerpts of the transcript of the Grafe deposition |
| are attached and marked to show testimony that is material to this motion. |
| By way of brief summary, Grafe testified that, after discussion with Grafe, the |
| Governor's chief-of-staff organized a telephone conference on September 7, 2020, which was |
| Labor Day. Grafe Tr. at 35:6-37:8 and 82:18-83:8. PacifiCorp, PGE and the Bonneville Power |
| Administration ("BPA") attended the telephone conference, which took place around 8:00 p.m. |
| Grafe Tr. at 40:2-5. There were three PacifiCorp representatives on the call. Grafe Tr. at 40:9- |
| 15. |
| During the conference, PacifiCorp was advised to initiate proactive power shutoffs |
| to mitigate the risk of its equipment starting fires. Grafe Tr. at 91:17-92:7.1 |
| Q. Is it your understanding that there was not authority on that call to mandate or direct that the utilities de-energize their power lines? |
| A. That is my understanding. |
| Q. And that's different than a request or asking we would like you to de- energize your power lines to avoid power line ignition. Correct? |
| A. That is different, yes. |
| Q. Okay. And do you agree with your previous testimony, and what Nik |
| [Blosser, Chief-of-Staff to Governor] told us, that the point of the call and the message conveyed to the utilities was: Here's the risk, we'd like you |
| to de-energize your power lines to avoid starting those fire ignitions? |
| A. That's correct. The word I might use is advise. |
| Grafe Tr. at 91:17-92:7. On questioning from PacifiCorp's counsel, Grafe confirmed this |
| testimony: |
| |
| ¹ These proactive power shutoffs have sometimes been referred to in this proceeding as "PSPS," or Public Safety Power Shutoffs. |

THE NEWLY-DISCOVERED EVIDENCE

II.

| 1 | Q. Okay. Just to be clear, do you recall if anyone on the call said: Hey utilities, we're advising you to shut off the power to avoid starting fires? |
|----|--|
| 2 | |
| 3 | A. That would have been the purpose of my briefing, to leave no misconception out there that there is a high potential for power line related fires on the landscape over the next 72 hours. That was clearly understood |
| 4 | based on my briefing. |
| 5 | Grafe Tr. at 97:6-14. |
| 6 | Grafe provided extensive briefing concerning the risk of fire: |
| 7 | A. I described the threat as significant from the crest of the Cascades west. The event was statewide . We had already experienced a new |
| 8 | ignition in southeast Oregon, Klamath. So the potential was statewide but in particular the downslope winds in the canyons is where we were |
| 9 | going to see the greatest wind velocities and thus potential for tree failures, limb failures and potential for power line related fires |
| 10 | |
| 11 | Grafe Tr. at 44:25-45:8 (emphasis added). Grafe felt discouraged at the end of the conference |
| 12 | because the utilities only wanted to talk about where existing fires were located, and not have a |
| 13 | meaningful conversation about shutting off the power to prevent further fires. Grafe Tr. at |
| 14 | 47:21-49:3 and 92:8-93:14. |
| 15 | III. PACIFICORP'S SANCTIONABLE CONDUCT |
| 16 | PacifiCorp did not disclose this critical meeting. It defies imagination that this meeting |
| 17 | occurred without any paper trail whatsoever, but Plaintiffs can find no document in PacifiCorp's |
| 18 | document productions relating to this meeting. ² Nor did any PacifiCorp witness, including at the |
| 19 | depositions of the corporation, disclose this meeting at deposition. It is highly unlikely that a |
| 20 | meeting of this magnitude would be forgotten by all of the relevant witnesses. Grafe testified |
| 21 | that he's never forgotten the call, and that during that "really powerful evening" it was "one of |
| 22 | the key conversations I had". Grafe Tr. at 54:12-18. Because PacifiCorp withheld this evidence, |
| 23 | |
| 24 | ² Even utilities that were not participants in the September 7, 2020 call with Grafe and the Governor's office knew about the call within hours, and produced documents concerning the call |

| 1 | Plaintiffs have been deprived of an opportunity to conduct further discovery as to this matter. |
|----|---|
| 2 | Plaintiffs' experts have been deprived of this evidence as well. |
| 3 | PacifiCorp has been ordered twice, on motions to compel, to disclose all facts known to it |
| 4 | concerning the cause and origin of these fires. The Court ruled on June 23, 2022 that |
| 5 | "Defendants' witnesses must testify about fire cause or area of origin information for the Labor |
| 6 | Day Fires known to them based on their personal knowledge that is independent and separate |
| 7 | from any confidential communication within the meaning of OEC 503(1)(b) from Defendants' |
| 8 | attorneys or Defendants' lead claims specialist Marlow Vass. This includes testimony about |
| 9 | photos, videos, measurements, observations, descriptions, opinions, vegetation, equipment, |
| 10 | communications, and documents relating to the same, that are independent and separate from any |
| 11 | confidential attorney or lead claim specialist opinions, communications or documents within the |
| 12 | meaning of OEC 503." Order Granting Motion to Compel at 2. The Court further ordered |
| 13 | PacifiCorp to produce all "communications, and documents relating to the causes and areas of |
| 14 | origin of the Labor Day fires *** dated or obtained before September 30, 2020. Then, at the |
| 15 | December 27, 2022 hearing on Plaintiffs' second motion to compel, the Court stated: " |
| 16 | Plaintiffs moved to compel deposition testimony from Pacificorp's lead Claims Specialist |
| 17 | Marlow Vass about facts known to her and opinions held by her that relate to the cause and |
| 18 | origin of the Labor Day fires. Plaintiffs' Motion to Compel is granted. Lead Senior Claims Agent |
| 19 | or Specialist Marlow Vass shall testify about facts known to her and opinions held by her that |
| 20 | relate to the cause and origin of the Labor Day fires." Hearing Tr. at 4. |
| 21 | The undisclosed September 7, 2020 meeting is highly relevant to the cause of the fires. |
| 22 | Plaintiffs claim that the fires at issue were caused by PacifiCorp's failure to shut off the power. |
| 23 | Until April 5, 2023, Plaintiffs did not know that PacifiCorp was advised by the State of Oregon |
| 24 | to shut the power off. This evidence is highly material to establishing that PacifiCorp was |
| 25 | negligent, and that their negligence was the cause of the fires. It is also highly material to |
| 26 | punitive damages. |
| | PAGE 4 - PLAINTIFFS' SUPPLEMENTAL MEMORANDUM IN SUPPORT OF |

PLAINTIFFS' SECOND MOTION TO SANCTION

| 1 | Plaintiffs took two additional depositions of Vass after the December 27, 2022 order. |
|----|--|
| 2 | Plaintiffs completed the deposition of Vass in her personal capacity on January 9, 2023, and took |
| 3 | her deposition as a Rule 39 C(6) representative of the corporation on January 27, 2023. In the |
| 4 | latter deposition, Vass provided the corporation's testimony regarding the cause and origin of the |
| 5 | fires. Vass was required to testify "as to matters known or reasonably available to the |
| 6 | organization," ORCP 39 C(6), not just known by her, but she did not speak to any other |
| 7 | employees to prepare for the deposition. Second Motion to Compel at 8. In three depositions, |
| 8 | Vass did not disclose PacifiCorp's September 7, 2020 telephone conference with the Governor's |
| 9 | Office and ODF Chief of Fire Protection, or that the State had advised PacifiCorp to shut off the |
| 10 | power at this critical time in the causation analysis. |
| 11 | PacifiCorp was required to prepare a witness to testify about the "proactive de- |
| 12 | energization of any powerlines in Your Oregon service territory, whether or not characterized as |
| 13 | a PSPS, on September 7 to 10, 2020, the facts and circumstances surrounding any decision to |
| 14 | proactively or to not proactively de-energize, the persons involved in making those decisions, |
| 15 | and all facts known to each such person that related to the decision to de-energize or to not de- |
| 16 | energize." Dep. Ex. 537, Subject No. 5. A meeting with the Governor's Office and ODF on |
| 17 | September 7, 2020, in which proactive de-energization was specifically discussed and PacifiCorp |
| 18 | was advised to de-energize plainly falls within this subject. PacifiCorp designated senior |
| 19 | executive Allen Berreth to testify on this subject at deposition on February 10, 2023. Berreth did |
| 20 | not disclose the telephone conference with ODF and the Governor's Office. See Berreth Tr. at |
| 21 | 28:1-30:6. Berreth could not identify any discussion on this topic, only generally that PSPS was |
| 22 | a topic of conversation. Id. |
| 23 | PacifiCorp was also required to prepare a witness to testify about "any external |
| 24 | communications between the [PacifiCorp Emergency Operations Center] or its members and any |
| 25 | |

PAGE 5 - PLAINTIFFS' SUPPLEMENTAL MEMORANDUM IN SUPPORT OF PLAINTIFFS' SECOND MOTION TO SANCTION

| 1 | outside entity, including first responders, state agencies, and local governments." Dep. Ex., 537, |
|----|--|
| 2 | Subject No. 9. Berreth was also designated to testify on this topic. Berreth did not disclose the |
| 3 | September 7 meeting or that PacifiCorp received fire risk information from Grafe and was |
| 4 | advised to shut off the power. |
| 5 | In addition, PacifiCorp was required to prepare a witness to "[i]dentify any first |
| 6 | responders, federal agencies, state agencies, and local governments with whom You initiated |
| 7 | communications from September 1-10, 2020, about the Labor Day 2020 windstorm or Labor |
| 8 | Day fires; the names of the person with whom You initiated communications; the date of those |
| 9 | communications; and the methods of communication." Dep. Ex. 537. PacifiCorp objected that |
| 10 | the subject was "vague, overbroad, and unduly burdensome to the extent it would require the |
| 11 | internal interview of dozens of PacifiCorp employees to see if they had any passing conversation |
| 12 | with government employee." Id. Obviously, this was not some "passing conversation." |
| 13 | PacifiCorp agreed to provide testimony concerning "corporate communications directed by |
| 14 | PacifiCorp's EOC or management." Id. PacifiCorp designated senior executive Erik |
| 15 | Brookhouse, a member of the Labor Day 2020 EOC, to testify on this subject on February 10 |
| 16 | and 13, 2023. Brookhouse also did not disclose the Labor Day meeting with ODF and the |
| 17 | Governor's office. |
| 18 | The cumulative effect of the discovery violations before this Court warrant imposition of |
| 19 | the most severe sanctions available. Plaintiffs have been deprived of deposition and document |
| 20 | discovery from PacifiCorp that could change the outcome of this lawsuit. It would be unfair to |

23

24

25

26

21

22

evidence, through its own fact and expert witnesses or even through cross-examination of Grafe,

allow PacifiCorp to withhold this evidence during two years of discovery and then present

PAGE 6 - PLAINTIFFS' SUPPLEMENTAL MEMORANDUM IN SUPPORT OF PLAINTIFFS' SECOND MOTION TO SANCTION

³ This subject was specifically directed to "the EOC that was stood up for the Labor Day 2020 windstorm in Oregon and ... the Labor Day Fires." Dep. Ex. 537, Subject No. 10. "EOC" refers to PacifiCorp's Emergency Operations Center. It is not disputed that the EOC was initiated as of 1:00 p.m. on September 7, 2020, about seven hours before the telephone conference with the Oregon Department of Forestry and the Governor's Office took place.

| 1 | in an effort to minimize Grafe's | s testimony, v | when Plaintiffs have been deprived of document and | | |
|---------------------------------|---|---|--|--|--|
| 2 | deposition discovery from PacifiCorp about this meeting and why PacifiCorp did not follow the | | | | |
| 3 | State's advice to turn off the power on Labor Day. | | | | |

| | MR. NTCHOBO: Patrick Ntchobo with Edelson | 09:32:39 |
| I | PC on behalf of the James plaintiffs. | 09:32:45 |
| | MR. DOW: Thanks Patrick. | 09:32:47 |
| | MR. GRANT: Before we begin can I have the | 09:32:50 |
| r | record reflect that although the lead case for this | 09:32:51 |
| Ċ | deposition is your case, that Mr. Grafe also | 09:32:53 |
| r | received subpoenas for the James and the Masso and | 09:32:58 |
| t | the Cook cases from counsel and so that's why there | 09:33:02 |
| a | are attorneys here for those cases. | 09:33:07 |
| | | Page 5 |

| 1 | MR. DOW: Thank you, Mike. | 09:33:09 |
|----|---|----------|
| 2 | * * * | |
| 3 | DOUG GRAFE, | |
| 4 | having first been sworn/affirmed by the Oregon | |
| 5 | Certified Shorthand Reporter, | |
| 6 | Registered Professional Reporter, | |
| 7 | testifies as follows: | |
| 8 | EXAMINATION | |
| 9 | BY MR. DOW: | 09:33:23 |
| 10 | Q. Good morning, Mr. Grafe. | 09:33:23 |
| 11 | A. Good morning. | 09:33:24 |
| 12 | Q. Can you please state your name for the | 09:33:25 |
| 13 | record? | 09:33:26 |
| 14 | A. Doug Grafe. | 09:33:27 |
| 15 | Q. Do you mind if I call you Doug? | 09:33:28 |
| 16 | A. No problem. | 09:33:30 |
| 17 | Q. Doug, have you ever been deposed before? | 09:33:31 |
| 18 | A. This will be my first deposition. | 09:33:34 |
| 19 | Q. Okay. Great. Well, we're going to make it | 09:33:35 |
| 20 | as easy as possible. There's just a few basic | 09:33:38 |
| 21 | ground rules I'll go over and then we'll get into | 09:33:39 |
| 22 | the meat of the deposition. | 09:33:42 |
| 23 | So do you understand that I'm going to ask | 09:33:43 |
| 24 | you questions and you provide the answers? | 09:33:46 |
| 25 | A. Yes. | 09:33:49 |
| | | Page 6 |

| 1 | question before we take a break. | 09:35:56 |
|----|---|----------|
| 2 | A. Copy. | 09:35:57 |
| 3 | Q. Trust me, I'm not going to let you take a | 09:35:57 |
| 4 | break if there's a pending question so you really | 09:36:01 |
| 5 | don't have to worry about that one. | 09:36:03 |
| 6 | So do you understand the nature of this | 09:36:04 |
| 7 | deposition concerns events that occurred in the | 09:36:08 |
| 8 | summer of 2020, in particular September 7, 2020? | 09:36:13 |
| 9 | A. Yes. | 09:36:16 |
| 10 | Q. Okay. Who did you work for on September 7, | 09:36:16 |
| 11 | 2020? | 09:36:22 |
| 12 | A. I served as the chief of fire protection | 09:36:22 |
| 13 | for the Oregon Department of Forestry. | 09:36:25 |
| 14 | Q. The Oregon Department of Forestry, is that | 09:36:28 |
| 15 | referred to as ODF? | 09:36:32 |
| 16 | A. Yes. | 09:36:34 |
| 17 | Q. What is ODF? | 09:36:34 |
| 18 | A. ODF is a state agency. As the chief of | 09:36:37 |
| 19 | fire protection I was responsible for fire | 09:36:43 |
| 20 | protection on approximately sixteen million acres | 09:36:45 |
| 21 | of lands across the State of Oregon; that's public | 09:36:48 |
| 22 | and private lands. | 09:36:51 |
| 23 | The Department of Forestry has other | 09:36:53 |
| 24 | responsibilities but I was within the fire division | 09:36:55 |
| 25 | of the agency as an executive team member. | 09:36:58 |
| | | Page 9 |
| - | | |

| 1 | the operations manager. I'd have to go back. | 09:38:29 |
|----|---|----------|
| 2 | I served I think six years total, in that | 09:38:35 |
| 3 | range, as the chief of fire protection for the | 09:38:39 |
| 4 | Department of Forestry. | 09:38:41 |
| 5 | Q. So as the chief of fire protection for the | 09:38:42 |
| 6 | Department of Forestry, what were your job duties | 09:38:46 |
| 7 | in general in that role? | 09:38:48 |
| 8 | A. Oversight of the protection system on the | 09:38:50 |
| 9 | jurisdiction responsibility we had, as I identified | 09:38:53 |
| 10 | sixteen million acres of fire protection. We had | 09:38:57 |
| 11 | 12 protection districts across the state that | 09:38:59 |
| 12 | provided fire protection services on forestry and | 09:39:04 |
| 13 | grazing lands, those responsibilities within the | 09:39:09 |
| 14 | district; provided support to rangeland fire | 09:39:12 |
| 15 | protection associations, which are volunteer | 09:39:16 |
| 16 | associations in the desert, east Oregon; oversight | 09:39:18 |
| 17 | of policy budget implementation and programatic | 09:39:25 |
| 18 | operations for fire protection services. | 09:39:30 |
| 19 | Q. I don't mean to ask a question that may | 09:39:33 |
| 20 | sound obvious but I want to make sure I understand | 09:39:36 |
| 21 | what it is. When you say fire protection what | 09:39:38 |
| 22 | exactly does that mean? Fire protection from what? | 09:39:43 |
| 23 | From any cause of fire? From certain causes of | 09:39:46 |
| 24 | fire? From certain results of a fire? What does | 09:39:48 |
| 25 | fire protection mean in that context? | 09:39:51 |
| | | Page 11 |

| 1 | A. There's a prevention, a readiness, and | 09:39:53 |
|----|---|----------|
| 2 | response functions relative to wildfire. So the | 09:39:57 |
| 3 | prevention components to prevent all causes, | 09:40:01 |
| 4 | human-caused fires that we can, minimize that; to | 09:40:06 |
| 5 | be ready to respond when fires start, whether by | 09:40:10 |
| 6 | lightening or human cause. So we have a state of | 09:40:14 |
| 7 | readiness, an adequate level of protection for our | 09:40:19 |
| 8 | jurisdictional responsibilities, so resources | 09:40:22 |
| 9 | including aviation as its wildfire engines to hand | 09:40:25 |
| 10 | crews, and then fireline leadership. And then the | 09:40:32 |
| 11 | response function which is when the fire starts, do | 09:40:34 |
| 12 | we have an adequate response. Those are the duties | 09:40:38 |
| 13 | of the fire protection division. So prevention, | 09:40:42 |
| 14 | readiness, response. | 09:40:44 |
| 15 | Q. Okay. And as the chief of fire protection | 09:40:45 |
| 16 | were you the person responsible for each of those | 09:40:48 |
| 17 | components, prevention, readiness and response? | 09:40:50 |
| 18 | A. Affirmative. | 09:40:53 |
| 19 | Q. Okay. It seems like from your accent | 09:40:53 |
| 20 | you're not from Oregon, maybe you're from New | 09:41:01 |
| 21 | England; is that right? | 09:41:05 |
| 22 | A. Correct. From Boston. So if I have to | 09:41:05 |
| 23 | articulate something, don't hesitate to, for the | 09:41:08 |
| 24 | record, I can do that. It's not uncommon. | 09:41:11 |
| 25 | Q. That's okay. Went to law school in Boston, | 09:41:14 |
| | | Page 12 |

| 9 | | |
|----|---|----------|
| 1 | management system, emergency manages in place, | 09:49:32 |
| 2 | communications, infrastructure. | 09:49:35 |
| 3 | The tribal members, nine recognized tribes | 09:49:38 |
| 4 | in the State of Oregon, all engage in fire | 09:49:42 |
| 5 | protection at some level. So those are partners in | 09:49:44 |
| 6 | the system. | 09:49:48 |
| 7 | And I would then - then through that | 09:49:48 |
| 8 | system would include down to the contractors where | 09:49:52 |
| 9 | we want a viable and robust firefighting network | 09:49:55 |
| 10 | nationally, so consider the private sector partners | 09:50:01 |
| 11 | in this fire protection system at a state level and | 09:50:06 |
| 12 | a national level. | 09:50:10 |
| 13 | Cities and then nonprofits, of course, | 09:50:11 |
| 14 | local government and nonprofits. And then frankly | 09:50:15 |
| 15 | I'd extend it to the Oregonians, the citizens we | 09:50:20 |
| 16 | serve. I consider everyone has a role in fire | 09:50:23 |
| 17 | protection and readying themselves and our | 09:50:27 |
| 18 | communities to be ready when fire hits. As | 09:50:32 |
| 19 | mentioned earlier, we are a state that experiences | 09:50:37 |
| 20 | fire conditions on an annual basis. | 09:50:40 |
| 21 | Q. I want to ask about some specific partners. | 09:50:43 |
| 22 | Was the governor's office a partner? | 09:50:45 |
| 23 | A. Of course. As an executive branch agency | 09:50:49 |
| 24 | we all answer to the governor's administration. So | 09:50:52 |
| 25 | in that role as a chief of fire protection I would | 09:50:56 |
| | | Page 19 |

| 1 | reported up to the governor's emergency public | 09:50:59 |
|----|---|----------|
| 2 | safety advisor at that time. | 09:51:05 |
| 3 | Q. And who was that? In 2020 who was that? | 09:51:06 |
| 4 | A. Constantin Sevear. | 09:51:09 |
| 5 | Q. And was the Oregon Public Utilities | 09:51:12 |
| 6 | Commission a partner? | 09:51:17 |
| 7 | A. Public Utility Commission is a member | 09:51:19 |
| 8 | one of the members of the Oregon Emergency Response | 09:51:21 |
| 9 | System. So I mentioned DOC and ODOT as one of | 09:51:23 |
| 10 | those but there's many agencies including the PUC. | 09:51:29 |
| 11 | Q. And as far as you know what was the PUC's | 09:51:31 |
| 12 | role in fire protection? | 09:51:35 |
| 13 | A. Each agency under the Oregon Emergency | 09:51:36 |
| 14 | Response System, which is really a mirror of the | 09:51:41 |
| 15 | National Emergency Response System, each agency has | 09:51:46 |
| 16 | what's known as emergency support functions where | 09:51:51 |
| 17 | they lead responses on any risk for wildfire, | 09:51:53 |
| 18 | Department of Forestry and the state fire marshal, | 09:51:59 |
| 19 | Oregon State Fire Marshal, are the lead agencies | 09:52:02 |
| 20 | that emergency support functions for a fire. | 09:52:05 |
| 21 | For utility issues that would be PUC. For | 09:52:09 |
| 22 | transportation issues and emergencies that would be | 09:52:12 |
| 23 | ODOT; for health related issues like a pandemic, | 09:52:15 |
| 24 | that would be Oregon Health Authority. So the | 09:52:19 |
| 25 | national infrastructure, the structure framework in | 09:52:23 |
| | | Page 20 |

| 1 | approximately in the range of probably 40 | 09:53:56 |
|----|---|----------|
| 2 | utility-related fires on an annual basis. So of a | 09:53:59 |
| 3 | thousand fires that we responded to as the | 09:54:03 |
| 4 | Department of Forestry, what's that, about four | 09:54:06 |
| 5 | percent? Three-four percent of the fires were | 09:54:08 |
| 6 | utility-related. So there's always lessons learned | 09:54:10 |
| 7 | about ignitions. | 09:54:14 |
| 8 | Part of our responsibility with the | 09:54:16 |
| 9 | Department of Forestry was to identify the cause of | 09:54:19 |
| 10 | fires and then I mentioned prevention as our | 09:54:24 |
| 11 | primary - one of our primary, with readiness and | 09:54:27 |
| 12 | response. We're a learning culture, so how can we | 09:54:30 |
| 13 | collectively learn how to prevent fires, so the | 09:54:35 |
| 14 | utilities play a significant role in that as | 09:54:40 |
| .5 | related to those causes. So I would consider them | 09:54:45 |
| .6 | a partner to help prevent fires. | 09:54:47 |
| 7 | Q. Okay. At the time when you were chief of | 09:54:49 |
| .8 | fire protection did you have an understanding that | 09:54:54 |
| 9 | if an electric utility power line was de-energized, | 09:54:56 |
| 0 | or not energized, that it would not be able to | 09:55:02 |
| 1 | start a wildfire? | 09:55:06 |
| 2 | A. That's affirmative. And the experience | 09:55:09 |
| 3 | would have had, in Oregon at that time, was in the | 09:55:12 |
| 1 | Gorge. I think that's the one, the Columbia River | 09:55:16 |
| 5 | Gorge, that's the area where utilities had taken I | 09:55:19 |
| | | Page 22 |

| | Simple Control of the | |
|----|--|----------|
| 1 | believe action in the past with public safety power | 09:55:25 |
| 2 | shutoffs. | 09:55:28 |
| 3 | Q. What do you mean by public safety power | 09:55:30 |
| 4 | shutoffs? | 09:55:33 |
| 5 | A. A public safety power shutoff is a utility | 09:55:33 |
| 6 | shutting down power to prevent a fire cause. | 09:55:37 |
| 7 | Q. What was the reference to the Gorge? | 09:55:43 |
| 8 | A. The Columbia River Gorge is the one area | 09:55:45 |
| 9 | that I recall is a place where we've had public | 09:55:49 |
| 10 | safety power shutoffs in Oregon. | 09:55:56 |
| 11 | Q. Do you know what utilities that involved? | 09:56:00 |
| 12 | A. I don't know all the utilities. There's | 09:56:04 |
| 13 | the consumer-owned utilities which there's 30 plus | 09:56:08 |
| 14 | in the State of Oregon, transmission, and then | 09:56:11 |
| 15 | investor-owned utilities. So I don't know who | 09:56:16 |
| 16 | covers that entirety, that service. PGE, I | 09:56:19 |
| 17 | believe, covers a good portion of the Gorge; I'm | 09:56:24 |
| 18 | not sure to the extent, how far east they go. | 09:56:29 |
| 19 | Q. And by PGE you're referring to Portland | 09:56:32 |
| 20 | General Electric? | 09:56:35 |
| 21 | A. Affirmative. | 09:56:35 |
| 22 | Q. Do you have a timeframe in mind when you're | 09:56:36 |
| 23 | talking about the Gorge public safety power | 09:56:40 |
| 24 | shutoff? | 09:56:43 |
| 25 | A. For the event, for the event on September | 09:56:44 |
| | | Page 23 |

| 1 | 7, 2020, that was my reference there. We learned | 09:56:49 |
|----|---|----------|
| 2 | that day that they had they were either | 09:56:54 |
| 3 | considering a public safety power shutoff that day, | 09:57:00 |
| 4 | didn't know the time of it, but I learned that at a | 09:57:04 |
| 5 | 1300 briefing. | 09:57:08 |
| 6 | Q. That was PGE? | 09:57:08 |
| 7 | A. Affirmative. | 09:57:10 |
| 8 | Q. And when you say public safety power | 09:57:10 |
| 9 | shutoff, is that also known as PSPS in your | 09:57:13 |
| 10 | experience? | 09:57:16 |
| 11 | A. Affirmative. | 09:57:16 |
| 12 | Q. When you were chief of fire protection did | 09:57:17 |
| 13 | you coordinate directly with utilities about fire | 09:57:22 |
| 14 | prevention measures such as PSPS? | 09:57:26 |
| 15 | A. I do not recall coordinating with | 09:57:28 |
| 16 | utilities in a significant way. I would engage in | 09:57:34 |
| 17 | the district budget meetings and that's where I saw | 09:57:37 |
| 18 | at the district level that partnership occurring, | 09:57:41 |
| 19 | particularly I remember specifically at Cascade | 09:57:45 |
| 20 | district, so east of Salem. I can recall them | 09:57:52 |
| 21 | being a member and engaged in that board. | 09:57:59 |
| 22 | Q. Prior to September 7, 2020, had you ever | 09:58:02 |
| 23 | convened a meeting or call to ask electric | 09:58:11 |
| 24 | utilities to de-energize their lines to avoid a | 09:58:16 |
| 25 | fire ignition? | 09:58:21 |
| | | Page 24 |

| | Vi- | |
|----|---|----------|
| 1 | A. I do not, I do not recall convening a | 09:58:22 |
| 2 | meeting or being a part of a statewide meeting of | 09:58:26 |
| 3 | that significance. | 09:58:31 |
| 4 | Q. Prior to September 7. | 09:58:33 |
| 5 | A. Correct. | 09:58:34 |
| 6 | Q. Prior to and you don't just for | 09:58:34 |
| 7 | clarity. Prior to September 7, 2020 you also don't | 09:58:39 |
| 8 | recall participating in such a meeting; is that | 09:58:42 |
| 9 | right? | 09:58:44 |
| 10 | A. At a site statewide level, no. | 09:58:44 |
| 11 | Q. Okay. How about other than at a statewide | 09:58:47 |
| 12 | level? | 09:58:51 |
| 13 | A. At the local level, so the district level, | 09:58:51 |
| 14 | those utilities utilities I recall being engaged | 09:58:55 |
| 15 | with the district budgeting process, being a part | 09:59:02 |
| 16 | of the mobilization plans. So who does the local | 09:59:05 |
| 17 | district call when we're having challenges with | 09:59:10 |
| 18 | power lines or access. Similar experiences with | 09:59:14 |
| 19 | what they would need with landowners, ensuring that | 09:59:17 |
| 20 | they have access to gates to respond to fires. So | 09:59:21 |
| 21 | they were going to build those local partnerships. | 09:59:25 |
| 22 | Q. But let me make sure it's clear. Before | 09:59:27 |
| 23 | September 7, 2020 had you ever been on a call with | 09:59:31 |
| 24 | electric utilities where the specific purpose of | 09:59:36 |
| 25 | the call was to request that they de-energize their | 09:59:39 |
| | | Page 25 |

| 1 | power lines because of particular weather | 09:59:43 |
|----|---|----------|
| 2 | conditions to avoid starting a fire? | 09:59:46 |
| 3 | A. No. | 09:59:47 |
| 4 | Q. Okay. Did you have an understanding in | 09:59:48 |
| 5 | September of 2020 what red flag warning conditions | 09:59:54 |
| 6 | meant? | 09:59:59 |
| 7 | A. Yes. | 09:59:59 |
| 8 | Q. And what does what was that | 09:59:59 |
| 9 | understanding? | 10:00:01 |
| 10 | A. A red flag warning is an elevation of | 10:00:02 |
| 11 | wildfire potential wildfire conditions. It | 10:00:07 |
| 12 | elevates it to a state of awareness and readiness | 10:00:10 |
| 13 | so we can prepare for any weather, any event. | 10:00:15 |
| 14 | Wind, lightning, dry, hazardous fuel conditions, | 10:00:20 |
| 15 | hot temperatures are examples of red flag warnings | 10:00:26 |
| 16 | that we would look for on a daily basis on our | 10:00:30 |
| 17 | daily briefings in readying the state. | 10:00:37 |
| 18 | Q. In September of 2020 what was your | 10:00:39 |
| 19 | understanding about the effect or the potential of | 10:00:45 |
| 20 | a PSPS by an electric utility to prevent power line | 10:00:50 |
| 21 | caused wildfire ignitions? | 10:00:56 |
| 22 | A. I learned of the Public Utility | 10:00:58 |
| 23 | Commission's engagement in that conversation with | 10:01:02 |
| 24 | utilities at 1300 on September 7. I mentioned the | 10:01:05 |
| 25 | Oregon Emergency Response System. I made a call | 10:01:13 |
| | | Page 26 |

| management requesting OERS, Oregon Emergency 10:01:25 Response System, provide a 1300 briefing. That's a 10:01:32 standard briefing readying the state for emergency 10:01:37 because at that time we definitely saw a high 10:01:41 potential of red flags for catastrophic event. 10:01:46 Q. And did you see high potential for a 10:01:49 catastrophic event that included a power line 10:01:53 caused wildfire? 10:01:58 A. Absolutely. The wind conditions, the main 10:02:00 concern for new ignitions on a wind event like that 10:02:06 would be a power line related fire. Trees coming 10:02:11 down, taking down power lines or limbs breaking off 10:02:15 of trees and making contact with power lines is not 10:02:24 certainly a key risk for human-caused fires. So at 10:02:27 the briefing when I heard the Public Utility 10:02:33 | | |
|---|---|----------|
| Response System, provide a 1300 briefing. That's a 10:01:32 standard briefing readying the state for emergency 10:01:37 because at that time we definitely saw a high 10:01:41 potential of red flags for catastrophic event. 10:01:46 Q. And did you see high potential for a 10:01:49 catastrophic event that included a power line 10:01:53 caused wildfire? 10:01:58 A. Absolutely. The wind conditions, the main 10:02:00 concern for new ignitions on a wind event like that 10:02:06 would be a power line related fire. Trees coming 10:02:11 down, taking down power lines or limbs breaking off 10:02:15 of trees and making contact with power lines is not 10:02:19 cuncommon during high wind events. So that was 10:02:24 certainly a key risk for human-caused fires. So at 10:02:27 the briefing when I heard the Public Utility 10:02:33 commission represent that they're working with the 10:02:40 safety power shutoffs, that made good sense to me. 10:02:48 identified that the Columbia River Gorge was an 10:02:56 a public safety power shutoff. 10:03:03 Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | the evening of the 6th to the director of emergency | 10:01:18 |
| because at that time we definitely saw a high potential of red flags for catastrophic event. Q. And did you see high potential for a catastrophic event that included a power line caused wildfire? A. Absolutely. The wind conditions, the main concern for new ignitions on a wind event like that down, taking down power lines or limbs breaking off of trees and making contact with power lines is not certainly a key risk for human-caused fires. So at the briefing when I heard the Public Utility commission represent that they're working with the safety power shutoffs, that made good sense to me. And I was content. And at that time they identified that the Columbia River Gorge was an area that there was a considerant on 10.03:05 Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | management requesting OERS, Oregon Emergency | 10:01:25 |
| potential of red flags for catastrophic event. Q. And did you see high potential for a 10:01:49 catastrophic event that included a power line caused wildfire? A. Absolutely. The wind conditions, the main concern for new ignitions on a wind event like that 10:02:06 would be a power line related fire. Trees coming down, taking down power lines or limbs breaking off of trees and making contact with power lines is not 10:02:19 concommon during high wind events. So that was certainly a key risk for human-caused fires. So at 10:02:27 the briefing when I heard the Public Utility 10:02:33 Commission represent that they're working with the atilities in the State of Oregon to consider public safety power shutoffs, that made good sense to me. And I was content. And at that time they identified that the Columbia River Gorge was an area that there was a consideration for initiating a public safety power shutoff. Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | Response System, provide a 1300 briefing. That's a | 10:01:32 |
| Q. And did you see high potential for a 10:01:49 catastrophic event that included a power line 10:01:53 caused wildfire? 10:01:58 A. Absolutely. The wind conditions, the main 10:02:00 concern for new ignitions on a wind event like that 10:02:06 would be a power line related fire. Trees coming 10:02:11 down, taking down power lines or limbs breaking off 10:02:15 of trees and making contact with power lines is not 10:02:19 cuncommon during high wind events. So that was 10:02:24 certainly a key risk for human-caused fires. So at 10:02:27 the briefing when I heard the Public Utility 10:02:33 Commission represent that they're working with the 10:02:37 cutilities in the State of Oregon to consider public 10:02:40 safety power shutoffs, that made good sense to me. 10:02:43 and I was content. And at that time they 10:02:53 area that there was a consideration for initiating 10:02:56 a public safety power shutoff. 10:03:03 | standard briefing readying the state for emergency | 10:01:37 |
| Q. And did you see high potential for a 10:01:49 catastrophic event that included a power line 10:01:53 caused wildfire? 10:01:58 A. Absolutely. The wind conditions, the main 10:02:00 concern for new ignitions on a wind event like that 10:02:06 would be a power line related fire. Trees coming 10:02:11 down, taking down power lines or limbs breaking off 10:02:15 of trees and making contact with power lines is not 10:02:19 cuncommon during high wind events. So that was 10:02:24 certainly a key risk for human-caused fires. So at 10:02:27 the briefing when I heard the Public Utility 10:02:33 commission represent that they're working with the 10:02:37 citilities in the State of Oregon to consider public 10:02:40 cafety power shutoffs, that made good sense to me. 10:02:48 cidentified that the Columbia River Gorge was an 10:02:56 a public safety power shutoff. 10:03:03 | because at that time we definitely saw a high | 10:01:41 |
| catastrophic event that included a power line 10:01:58 A. Absolutely. The wind conditions, the main 10:02:00 concern for new ignitions on a wind event like that 10:02:06 would be a power line related fire. Trees coming 10:02:11 down, taking down power lines or limbs breaking off 10:02:15 of trees and making contact with power lines is not 10:02:19 uncommon during high wind events. So that was 10:02:24 certainly a key risk for human-caused fires. So at 10:02:27 the briefing when I heard the Public Utility 10:02:33 Commission represent that they're working with the 10:02:40 cafety power shutoffs, that made good sense to me. 10:02:43 And I was content. And at that time they 10:02:48 identified that the Columbia River Gorge was an 10:02:56 a public safety power shutoff. Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | potential of red flags for catastrophic event. | 10:01:46 |
| A. Absolutely. The wind conditions, the main 10:02:00 concern for new ignitions on a wind event like that 10:02:06 would be a power line related fire. Trees coming 10:02:11 down, taking down power lines or limbs breaking off 10:02:15 of trees and making contact with power lines is not 10:02:19 cuncommon during high wind events. So that was 10:02:24 certainly a key risk for human-caused fires. So at 10:02:27 the briefing when I heard the Public Utility 10:02:33 commission represent that they're working with the 10:02:37 catilities in the State of Oregon to consider public 10:02:40 safety power shutoffs, that made good sense to me. 10:02:48 identified that the Columbia River Gorge was an 10:02:56 a public safety power shutoff. 10:03:03 | Q. And did you see high potential for a | 10:01:49 |
| A. Absolutely. The wind conditions, the main 10:02:00 concern for new ignitions on a wind event like that 10:02:06 would be a power line related fire. Trees coming 10:02:11 down, taking down power lines or limbs breaking off 10:02:15 of trees and making contact with power lines is not 10:02:19 cuncommon during high wind events. So that was 10:02:24 certainly a key risk for human-caused fires. So at 10:02:27 the briefing when I heard the Public Utility 10:02:33 commission represent that they're working with the 10:02:37 cutilities in the State of Oregon to consider public 10:02:40 safety power shutoffs, that made good sense to me. 10:02:43 and I was content. And at that time they 10:02:48 identified that the Columbia River Gorge was an 10:02:53 area that there was a consideration for initiating 10:02:56 a public safety power shutoff. 10:03:03 | catastrophic event that included a power line | 10:01:53 |
| concern for new ignitions on a wind event like that 10:02:06 would be a power line related fire. Trees coming 10:02:11 down, taking down power lines or limbs breaking off 10:02:15 of trees and making contact with power lines is not 10:02:19 uncommon during high wind events. So that was 10:02:24 certainly a key risk for human-caused fires. So at 10:02:27 the briefing when I heard the Public Utility 10:02:33 Commission represent that they're working with the 10:02:37 utilities in the State of Oregon to consider public 10:02:40 safety power shutoffs, that made good sense to me. 10:02:43 And I was content. And at that time they 10:02:48 identified that the Columbia River Gorge was an 10:02:53 area that there was a consideration for initiating 10:02:56 a public safety power shutoff. 10:03:03 | caused wildfire? | 10:01:58 |
| would be a power line related fire. Trees coming down, taking down power lines or limbs breaking off trees and making contact with power lines is not uncommon during high wind events. So that was certainly a key risk for human-caused fires. So at the briefing when I heard the Public Utility commission represent that they're working with the utilities in the State of Oregon to consider public safety power shutoffs, that made good sense to me. And I was content. And at that time they identified that the Columbia River Gorge was an area that there was a consideration for initiating Q. This was a briefing at 1300, or 1 p.m., on 10:02:15 10:02:27 10:02:27 10:02:23 10:02:37 10:02:40 10:02:40 10:02:40 10:02:45 10:02:45 10:02:56 10:03:03 | A. Absolutely. The wind conditions, the main | 10:02:00 |
| down, taking down power lines or limbs breaking off 10:02:15 of trees and making contact with power lines is not 10:02:19 uncommon during high wind events. So that was 10:02:24 certainly a key risk for human-caused fires. So at 10:02:27 the briefing when I heard the Public Utility 10:02:33 Commission represent that they're working with the 10:02:37 utilities in the State of Oregon to consider public 10:02:40 safety power shutoffs, that made good sense to me. 10:02:43 And I was content. And at that time they 10:02:48 identified that the Columbia River Gorge was an 10:02:53 area that there was a consideration for initiating 10:02:56 a public safety power shutoff. 10:03:03 Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | concern for new ignitions on a wind event like that | 10:02:06 |
| of trees and making contact with power lines is not 10:02:19 uncommon during high wind events. So that was 10:02:24 certainly a key risk for human-caused fires. So at 10:02:27 the briefing when I heard the Public Utility 10:02:33 Commission represent that they're working with the 10:02:37 utilities in the State of Oregon to consider public 10:02:40 safety power shutoffs, that made good sense to me. 10:02:43 And I was content. And at that time they 10:02:48 identified that the Columbia River Gorge was an 10:02:53 area that there was a consideration for initiating 10:02:56 a public safety power shutoff. 10:03:03 | would be a power line related fire. Trees coming | 10:02:11 |
| certainly a key risk for human-caused fires. So at 10:02:27 the briefing when I heard the Public Utility 10:02:33 Commission represent that they're working with the 10:02:37 utilities in the State of Oregon to consider public 10:02:40 safety power shutoffs, that made good sense to me. 10:02:43 And I was content. And at that time they 10:02:48 identified that the Columbia River Gorge was an 10:02:53 area that there was a consideration for initiating 10:02:56 a public safety power shutoff. 10:03:03 Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | down, taking down power lines or limbs breaking off | 10:02:15 |
| the briefing when I heard the Public Utility 10:02:33 Commission represent that they're working with the 10:02:37 utilities in the State of Oregon to consider public safety power shutoffs, that made good sense to me. 10:02:43 And I was content. And at that time they identified that the Columbia River Gorge was an 10:02:53 area that there was a consideration for initiating Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | of trees and making contact with power lines is not | 10:02:19 |
| Commission represent that they're working with the 10:02:37 utilities in the State of Oregon to consider public 10:02:40 safety power shutoffs, that made good sense to me. 10:02:43 And I was content. And at that time they 10:02:48 identified that the Columbia River Gorge was an 10:02:53 area that there was a consideration for initiating 10:02:56 a public safety power shutoff. 10:03:03 Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | uncommon during high wind events. So that was | 10:02:24 |
| Commission represent that they're working with the 10:02:37 attilities in the State of Oregon to consider public 10:02:40 safety power shutoffs, that made good sense to me. 10:02:43 and I was content. And at that time they 10:02:48 identified that the Columbia River Gorge was an 10:02:53 area that there was a consideration for initiating 10:02:56 a public safety power shutoff. 10:03:03 Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | certainly a key risk for human-caused fires. So at | 10:02:27 |
| utilities in the State of Oregon to consider public 10:02:40 safety power shutoffs, that made good sense to me. 10:02:43 And I was content. And at that time they 10:02:48 identified that the Columbia River Gorge was an 10:02:53 area that there was a consideration for initiating 10:02:56 a public safety power shutoff. 10:03:03 Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | the briefing when I heard the Public Utility | 10:02:33 |
| safety power shutoffs, that made good sense to me. 10:02:43 And I was content. This was a briefing at 1300, or 1 p.m., on 10:03:05 | Commission represent that they're working with the | 10:02:37 |
| And I was content. And at that time they 10:02:48 identified that the Columbia River Gorge was an 10:02:53 area that there was a consideration for initiating 10:02:56 a public safety power shutoff. 10:03:03 Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | utilities in the State of Oregon to consider public | 10:02:40 |
| identified that the Columbia River Gorge was an 10:02:53 area that there was a consideration for initiating 10:02:56 a public safety power shutoff. 10:03:03 Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | safety power shutoffs, that made good sense to me. | 10:02:43 |
| area that there was a consideration for initiating 10:02:56 a public safety power shutoff. 10:03:03 Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | And I was content. And at that time they | 10:02:48 |
| Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | identified that the Columbia River Gorge was an | 10:02:53 |
| Q. This was a briefing at 1300, or 1 p.m., on 10:03:05 | area that there was a consideration for initiating | 10:02:56 |
| | a public safety power shutoff. | 10:03:03 |
| Page 27 | Q. This was a briefing at 1300, or 1 p.m., on | 10:03:05 |
| | | Page 27 |

| - | | |
|-----|---|----------|
| 1 | A. No. | 10:04:24 |
| 2 | Q. You mentioned the PUC made some remarks at | 10:04:24 |
| 3 | that briefing? | 10:04:31 |
| 4 | A. Yes. | 10:04:31 |
| 5 | Q. Do you know who from the PUC made those | 10:04:31 |
| 6 | remarks? | 10:04:34 |
| 7 | A. I do not. But we would have a standard | 10:04:34 |
| 8 | agenda. This was not a unique situation. A 1300 | 10:04:36 |
| 9 | briefing is standard. So Office of Emergency | 10:04:40 |
| 10 | Management would follow standard protocols and who | 10:04:43 |
| 11 | to invite. The only focus or nuance between any of | 10:04:46 |
| 12 | those briefing is what's the incident about. Is it | 10:04:53 |
| 13 | a public health incident? Then you know that's | 10:04:56 |
| 14 | where the focus is. This was about a weather event | 10:04:59 |
| 15 | and a wind event and so we all received briefing on | 10:05:02 |
| 16 | the weather potential and risks that were facing | 10:05:06 |
| L7 | us? | 10:05:10 |
| L8 | Q. Now September 7, 2020 was Labor Day, so | 10:05:12 |
| L 9 | that's Monday. The day before was Sunday, | 10:05:15 |
| 20 | September 6. When did you become when did you | 10:05:18 |
| 21 | first recall becoming aware of the risk of a high | 10:05:22 |
| 22 | wind event that the state saw on September 7 and | 10:05:25 |
| 23 | September 8? | 10:05:31 |
| 24 | A. Typical weather events are forecasted with | 10:05:31 |
| 25 | some confidence around five to seven days in | 10:05:38 |
| 16. | | Page 29 |

| advance. So at that time you would have seen an | 10:05:41 |
|---|----------|
| uptick from the Department of Forestry and our | 10:05:48 |
| prevention partners including the state fire | 10:05:51 |
| marshal and a nonprofit organization, Keep Oregon | 10:05:56 |
| Green, getting the message out. | 10:05:58 |
| Two-fold was really important to us. It | 10:06:01 |
| is typical during the holiday weekends that we can | 10:06:04 |
| see an uptick in human activities out and about out | 10:06:07 |
| in the forest so we're going to target messaging | 10:06:11 |
| around, you know, be fire safe during these holiday | 10:06:14 |
| weekends when you're out and about. | 10:06:18 |
| Five to seven days we would have heard of | 10:06:21 |
| an east wind event. So I don't know specifically | 10:06:23 |
| along those days did we target any of our messaging | 10:06:26 |
| to say: And we have a potential east wind event. | 10:06:30 |
| We could look at the records there what the media | 10:06:34 |
| outreach was, but it is typical for us to have a | 10:06:38 |
| five to seven day window with some confidence but | 10:06:42 |
| we don't know to the extent. Is it moderate, high | 10:06:45 |
| or an extreme event? | 10:06:48 |
| It was Sunday afternoon, the day before | 10:06:49 |
| Labor Day, that I had good confidence that it's | 10:06:55 |
| going to be a significant east wind event. East | 10:06:58 |
| wind events are not uncommon in the fall for | 10:07:02 |
| Oregon. We do receive east wind events like this, | 10:07:06 |
| | Page 30 |
| | 3- |

| but on the day before Labor Day on Sunday evening | 10:07:10 |
|---|----------|
| as part of the multi-agency coordination group, I'm | 10:07:15 |
| sorry, I mentioned the Pacific Northwest | 10:07:21 |
| coordinating group, so federal and state partners, | 10:07:23 |
| we're in a daily meeting cadence at this time in | 10:07:26 |
| fire season where we're receiving briefings at 1600 | 10:07:31 |
| daily on the fire situation and the potential | 10:07:35 |
| moving forward. | 10:07:38 |
| And that at that event, that evening, 1600 | 10:07:39 |
| event, I felt with confidence that this was going | 10:07:42 |
| to be a significant event. And that's what | 10:07:45 |
| initiated me to ask for the Oregon Emergency | 10:07:48 |
| Response System to stand up so that all emergency | 10:07:51 |
| responders in the State of Oregon were prepared for | 10:07:56 |
| an event that was projected to occur some time the | 10:08:01 |
| evening of Labor Day. | 10:08:04 |
| Q. Okay. So you had a call with the Pacific | 10:08:05 |
| Northwest coordinating group at 1600 or 4 p.m. on | 10:08:09 |
| Sunday. Correct? | 10:08:12 |
| A. Correct. | 10:08:13 |
| Q. And then there was a subsequent call on | 10:08:15 |
| Sunday with the am I correct there was another | 10:08:17 |
| call on Sunday then as well that you had? | 10:08:21 |
| A. Sorry. | 10:08:23 |
| Q. Director of emergency management. | 10:08:24 |
| | Page 31 |
| | |

| 1 | A. Oh, yes. Following the 1600 briefing that | 10:08:26 |
|----|---|----------|
| 2 | I had with the Pacific Northwest coordination | 10:08:30 |
| 3 | group, I called the Oregon emergency manager to | 10:08:32 |
| 4 | stand up the following day's 1300 briefing. | 10:08:41 |
| 5 | Q. Okay. Who was the Oregon emergency manager | 10:08:46 |
| 6 | at that time? | 10:08:51 |
| 7 | A. Andrew Phelps. | 10:08:51 |
| 8 | Q. Can you spell Phelps? | 10:08:54 |
| 9 | A. P-H-E-L-P-S, I believe. | 10:08:54 |
| 10 | Q. Okay. And so then he did stand up the 1300 | 10:08:58 |
| 11 | call? | 10:09:05 |
| 12 | A. Affirmative. | 10:09:05 |
| 13 | Q. On Monday, September 7. Okay. | 10:09:06 |
| 14 | Approximately how long did the 1300 call on | 10:09:09 |
| 15 | September 7 last? | 10:09:12 |
| 16 | A. That's a standard call. I believe it goes | 10:09:13 |
| 17 | an hour as a briefing. | 10:09:16 |
| 18 | Q. What was the next call that you had on | 10:09:19 |
| 19 | September 7 concerning fire protection because of | 10:09:24 |
| 20 | the wind event? | 10:09:28 |
| 21 | A. I would have moved from let me back up. | 10:09:29 |
| 22 | We're in a daily cadence with the Pacific | 10:09:35 |
| 23 | Northwest coordinating group. We would have stood | 10:09:37 |
| 24 | up what's referred to as a MAC, multi-agency | 10:09:40 |
| 25 | coordination, which is those nine primary designees | 10:09:45 |
| | | Page 32 |

| 1 | in Pacific Northwest coordination group. We stand | 10:09:50 |
|----|--|----------|
| 2 | up a multi-agency coordination group and we have a | 10:09:52 |
| 3 | daily cadence of briefings that start from 0700 | 10:09:56 |
| 4 | that end at 2000 at times depending on the nature | 10:10:02 |
| 5 | of the events of the day of fire potential. | 10:10:05 |
| 6 | We would have continued our 1600 briefings | 10:10:11 |
| 7 | that day. | 10:10:15 |
| 8 | Q. Um-hum. | 10:10:16 |
| 9 | A. And I would have learned of what's the | 10:10:16 |
| 10 | latest weather conditions and what's the latest | 10:10:21 |
| 11 | situation on the ground relative to fires. Both in | 10:10:25 |
| 12 | Oregon and Washington. | 10:10:32 |
| 13 | Q. On September 7 did you have a call with | 10:10:33 |
| 14 | representatives from the governor's office and the | 10:10:39 |
| 15 | PUC concerning utility de-energization to prevent | 10:10:42 |
| 16 | wildfires? | 10:10:49 |
| 17 | A. I had a call with the governor's office | 10:10:49 |
| 18 | and utilities. I don't know I don't recall if | 10:10:54 |
| 19 | the PUC was in that was the evening of the 7th. | 10:11:00 |
| 20 | Q. Did you have a call with the governor's | 10:11:04 |
| 21 | office prior to the call with the utilities to | 10:11:07 |
| 22 | discuss the call with the utilities? | 10:11:09 |
| 23 | A. Yes. I would have been in constant | 10:11:12 |
| 24 | contact with my emergency response advisor | 10:11:15 |
| 25 | Constantin Sevear, continually updating him on | 10:11:20 |
| | | Page 33 |

| activiti | es. | 10:11:22 |
|-----------|---|----------|
| Q. | What were the nature of your conversations | 10:11:25 |
| with Mr. | Sevear on the 7th concerning the weather | 10:11:26 |
| condition | ns and the need for utilities to | 10:11:32 |
| de-energ | ize to prevent further ignitions? | 10:11:35 |
| Α. | So following the 1300 where the state is | 10:11:40 |
| ready and | d prepared for fires best we can, would | 10:11:45 |
| have move | ed to a 1600 call, a daily cadence with a | 10:11:50 |
| multi-age | ency coordination group. Some time after | 10:11:54 |
| that the | event would have reached Oregon. Of | 10:11:57 |
| course we | e were following the event throughout the | 10:12:01 |
| day becar | use it was coming from Canada to Washington | 10:12:04 |
| and into | Oregon. So we could see the progress of | 10:12:09 |
| the wind | event and fire activity that it was | 10:12:14 |
| initiatin | ng in other states, particularly | 10:12:19 |
| Washingto | on. It reached Oregon some time in the | 10:12:23 |
| evening a | as predicted and I would have kept my | 10:12:28 |
| advisor u | up to speed, the emergency response | 10:12:33 |
| advisor, | Constantin Sevear, the governor's office | 10:12:37 |
| up to spe | eed on the progress activity in Oregon. We | 10:12:39 |
| had a nev | w fire, the first fire to hit us in Oregon, | 10:12:43 |
| new fire | that the wind event initiated was the fire | 10:12:48 |
| 242 fire | just north of Klamath Falls. And I don't | 10:12:56 |
| recall th | ne time of those events but I would have | 10:13:02 |
| | up to the governor's office that we've got | 10:13:05 |
| reported | | |

| a new i | gnition and we're deploying an incident | 10:13:09 |
|----------|---|----------------------|
| manageme | ent team to that fire. | 10:13:12 |
| Q. | Okay. Did you do you know who Nik | 10:13:14 |
| Blosser | is? | 10:13:19 |
| Α. | Yes. | 10:13:19 |
| Q. | Did you understand Nik Blosser was the | 10:13:20 |
| chief o | staff of the Oregon governor's office at | 10:13:23 |
| the time | e? | 10:13:25 |
| Α. | Yes. | 10:13:25 |
| Q. | Did you call Nik Blosser about requesting | 10:13:25 |
| the util | lities to de-energize their lines? | 10:13:30 |
| Α. | I did speak with Nik Blosser on the | 10:13:32 |
| evening | of Labor Day to discuss de-energizing | 10:13:34 |
| lines, y | res. | 10:13:43 |
| Q. | And do you know who else was on the | 10:13:44 |
| conversa | ation when you spoke with Nik Blosser? | 10:13:48 |
| Α. | It was the evening following multiple | 10:13:49 |
| phone ca | alls into my office from first responders | 10:13:54 |
| that we | were having challenges with downed power | 10:13:59 |
| lines ar | nd evacuations and multiple calls asking me | 10:14:02 |
| | our of sublic sefety sever shutoffs and | 10:14:11 |
| the stat | tus of public safety power shutoffs, are | 10.11.11 |
| | oing to happen or not based on what we all | 10:14:16 |
| those go | | |
| those go | oing to happen or not based on what we all | 10:14:16 |
| those go | oing to happen or not based on what we all | 10:14:16 10:14:19 |

| downed lines across roads that were impacting | 10:14:34 |
|---|----------|
| evacuations. That initiated me to connect with | 10:14:38 |
| both Constantin Sevear and chief of staff Nik | 10:14:43 |
| Blosser with the interest two-fold, frankly, to | 10:14:49 |
| elevate awareness that our concerns for the day are | 10:14:53 |
| coming to fruition and I needed them at the highest | 10:14:57 |
| level to understand we're entering the first few | 10:15:01 |
| hours of a 72-hour wind event that's going to | 10:15:05 |
| continue to cause issues like we're experiencing | 10:15:09 |
| now. And I didn't want any gap in information and | 10:15:11 |
| understanding of the gravity of that situation up | 10:15:15 |
| to the top of the chief of staff. | 10:15:18 |
| Q. Did you want them to get the utilities | 10:15:24 |
| together so that you could request that they do | 10:15:28 |
| power shutoff? | 10:15:30 |
| A. Yeah. Before that moment I had | 10:15:31 |
| Constantin Sevear had connected me with the advisor | 10:15:38 |
| who works with the utilities. Her name is Kristen | 10:15:40 |
| - I forget her last name. | 10:15:46 |
| Q. Sheehan? | 10:15:47 |
| A. Sheehan, yes. Kristen Sheehan and I were | 10:15:48 |
| on multiple calls. She was my point of contact to | 10:15:52 |
| nelp coordinate shutoffs with utilities around the | 10:15:57 |
| state. And at one point in the evening I felt like | 10:16:04 |
| I needed to elevate that further to make sure, at | 10:16:10 |
| | Page 36 |
| | |

| the highest | | |
|--------------|--|----------|
| | level, Nik Blosser and I briefed | 10:16:14 |
| personally a | so the message was clear. When I had | 10:16:18 |
| described to | o him what was going on about our | 10:16:23 |
| potential, t | the current conditions we're facing, | 10:16:26 |
| between v | with he and I discussing, he said let's | 10:16:31 |
| get the util | lities on a phone call as soon as | 10:16:34 |
| possible to | ensure their awareness of the | 10:16:38 |
| situation. | | 10:16:43 |
| Q. Was | s one of the purposes of that phone call | 10:16:43 |
| with the uti | ilities to request that they de-energize | 10:16:45 |
| their power | lines to avoid fire ignitions | 10:16:49 |
| throughout t | the state? | 10:16:52 |
| A. For | that phone call the objective I chose | 10:16:53 |
| two-fold. V | Where we had power lines down we | 10:16:58 |
| absolutely v | were requesting can we get these lines | 10:17:01 |
| shut off so | we can evacuate folks. And then two, | 10:17:05 |
| wanted to er | nsure that the decision-makers at the | 10:17:08 |
| power compar | nies understood the gravity of the | 10:17:12 |
| situation ar | nd were briefed so they could consider | 10:17:15 |
| public safet | ty power shutoffs. And I was curious of | 10:17:20 |
| what the sta | atus of those were on their decisions. | 10:17:25 |
| O Die | that call with the utilities happen? | 10:17:35 |
| Q. Did | | |
| A. Yes | 3. | 10:17:38 |
| A. Yes | en did it happen? | 10:17:38 |
| A. Yes | | 10:17:39 |

| 1 | to wager a range, between 2000-ish to 2200. It was | 10:17:45 |
|----|---|----------|
| 2 | a long night. But it was in the evening. I would | 10:17:54 |
| 3 | have to check the phone records or anything I have | 10:17:57 |
| 4 | there. | 10:18:02 |
| 5 | Q. Do you have those phone records? | 10:18:02 |
| 6 | A. I don't have my I don't have my phone | 10:18:04 |
| 7 | from that date because I moved on to different | 10:18:08 |
| 8 | positions. | 10:18:10 |
| 9 | Q. Who called the meeting? | 10:18:11 |
| 10 | A. Nik Blosser, chief of staff for the | 10:18:16 |
| 11 | governor, organized the call. | 10:18:23 |
| 12 | Q. Okay. You mentioned Nik Blosser, so I've | 10:18:25 |
| 13 | spoken with Nik Blosser about the call with the | 10:18:31 |
| 14 | utilities as well as the, what I'll describe as the | 10:18:36 |
| 15 | pre-communication that he had with you. And what | 10:18:39 |
| 16 | Nik told me was that the purpose of the call with | 10:18:45 |
| 17 | the utilities was to request that the utilities | 10:18:51 |
| 18 | de-energize their lines to avoid fire ignitions. | 10:18:54 |
| 19 | Is that consistent with what you recall? | 10:18:58 |
| 20 | A. Yeah. We wanted to inform I think the | 10:19:00 |
| 21 | nuance is I would have followed Nick's lead because | 10:19:05 |
| 22 | I don't have the authority to direct a utility to | 10:19:09 |
| 23 | shut off power. Right? I would have followed | 10:19:13 |
| 24 | Nick's lead in terms of specifically directing or | 10:19:17 |
| 25 | asking the utilities to shut power off in a | 10:19:22 |
| 1 | | Page 38 |

| proactiv | e way, public safety power shutoff. So I | 10:19:2 |
|-----------|---|----------|
| felt ver | y comfortable where we had downed power | 10:19:29 |
| lines th | at we really needed those lines off to | 10:19:33 |
| pull. | | 10:19:3 |
| | The purpose of the meeting was to advise | 10:19:30 |
| at an ex | ecutive level at the utilities to be | 10:19:40 |
| informed | so that they can make a decision. Their | 10:19:49 |
| responsi | bility. It's their decision but I didn't | 10:19:5 |
| have tha | t authority to direct. | 10:19:5 |
| Q. | Sure. In speaking with Nik, Nik agreed | 10:19:50 |
| that the | state didn't have a mandate to tell to | 10:19:59 |
| mandate | that they de-energize lines. One of the | 10:20:04 |
| things t | hat Nik says he does remember is that there | 10:20:00 |
| needed to | o be a request not just that they | 10:20:13 |
| de-energ | ize the lines that had already gone down, | 10:20:13 |
| but that | they de-energize the lines to prevent them | 10:20:1 |
| from goi | ng down and igniting fires. Do you agree | 10:20:19 |
| with tha | c? | 10:20:23 |
| A. | I agree with that. | 10:20:23 |
| Q. | Okay. And so Nik has also provided us some | 10:20:24 |
| | om the meeting that indicate that it | 10:20:33 |
| notes fro | | |
| -12 | at 8 p.m., or 2000. Would that be | 10:20:36 |
| happened | at 8 p.m., or 2000. Would that be | 10:20:36 |
| happened | | |
| happened | nt with your memory as well? | 10:20:3 |

| 2 | | |
|----|--|------------|
| 1 | A. Yeah. | 10:20:41 |
| 2 | Q. So who was present at the call with the | 10:20:41 |
| 3 | utilities then that happened around eight o'clock? | 10:20:52 |
| 4 | A. Three utilities were present. It was BPA, | 10:20:55 |
| 5 | PGE, and PacificCorp. | 10:21:08 |
| 6 | Q. Do you know if any other utilities were | 10:21:14 |
| 7 | invited to the call? | 10:21:16 |
| 8 | A. I do not know. | 10:21:18 |
| 9 | Q. Nik's notes, and what Nik Provided to us, | 10:21:19 |
| 10 | indicated that Scott Bolton was present from | 10:21:28 |
| 11 | PacifiCorp. Is that what you recall? | 10:21:30 |
| 12 | A. All those individuals would have been new | 10:21:33 |
| 13 | to me. I didn't have a relationship there so I | 10:21:36 |
| 14 | don't know. It was three representations from each | 10:21:41 |
| 15 | of those organizations. | 10:21:44 |
| 16 | Q. Did you know who Scott Bolton was? | 10:21:45 |
| 17 | A. No. | 10:21:49 |
| 18 | Q. Did you know who JD Podlesnik was from PGE? | 2 10:21:49 |
| 19 | A. No. | 10:21:55 |
| 20 | Q. JD Podlesnik was Nik noted that JD | 10:21:56 |
| 21 | Podlesnik was there from PGE, and Dave Robertson | 10:21:59 |
| 22 | from PGE; do you know who either of those folks | 10:22:02 |
| 23 | were? | 10:22:05 |
| 24 | A. No. | 10:22:05 |
| 25 | Q. Okay. What Nik told us is that during the | 10:22:05 |
| | | Page 40 |

| call the request was made to the utilities to | 10:22:13 |
|---|----------|
| de-energize their lines to avoid fire ignitions. | 10:22:16 |
| Is that what you recall? | 10:22:20 |
| A. Again, I would have followed Nick's lead | 10:22:20 |
| on how that was articulated because it wasn't my | 10:22:27 |
| authority to direct; but I prepared, in that | 10:22:32 |
| conversation, everybody to understand the gravity | 10:22:35 |
| of the situation and advised that more fires will | 10:22:38 |
| occur from utilities; with the wind there's high | 10:22:43 |
| potential for that to occur. So I don't recall if | 10:22:48 |
| I specifically said requested or directed the | 10:22:53 |
| utilities to shut power off proactively at that | 10:22:58 |
| point. I would have allowed that would have | 10:23:04 |
| been a higher level with Nik Blosser to navigate | 10:23:07 |
| that conversation. So I provided the briefing to | 10:23:11 |
| make everyone aware that that potential is | 10:23:14 |
| significant. | 10:23:17 |
| Q. If Nick's recollection is that the | 10:23:17 |
| utilities - the request was made to de-energize | 10:23:24 |
| because of the fire ignition, are you disputing | 10:23:27 |
| Nick's memory? | 10:23:31 |
| MR. GRANT: Hold one for a second. | 10:23:34 |
| Are you asking him if he remembers, first | 10:23:40 |
| of all, what was said? I thought we've already | 10:23:42 |
| covered that he doesn't remember. | 10:23:46 |
| | Page 41 |

| Was it stated to the utilities what the of the call was? | 10:24:42 | |
|--|--|--|
| of the call was? | 10.24.47 | |
| | 10.21.1/ | |
| I would assume Nik Blosser opened up | 10:24:48 | |
| ing for the purpose of the call. | 10:24:59 | |
| And what was the purpose of the call that | 10:25:01 | |
| ed with? | 10:25:04 | |
| To inform the utilities, provide a | 10:25:04 | |
| to the utilities on what I briefed Nik | 10:25:11 | |
| on, which was the conditions, fire | 10:25:15 | |
| ns on the landscape and the potential for | 10:25:21 | |
| e ignitions from utilities. | 10:25:25 | |
| And was it conveyed to the utilities that | 10:25:30 | |
| de-energized their lines they can avoid | 10:25:34 | |
| tential fire ignitions? | 10:25:37 | |
| Yes. That would have been clear. | 10:25:39 | |
| Okay. Because otherwise what would be the | 10:25:41 | |
| the call. Right? | 10:25:43 | |
| Correct. | 10:25:44 | |
| Did you feel it was made clear to the | 10:25:52 | |
| s in the call that they were being | 10:25:54 | |
| d to de-energize their lines to avoid fire | 10:25:59 | |
| 5? | 10:26:02 | |
| I feel like that meeting that the | 10:26:05 | |
| s had a that message was clear to them, | 10:26:10 | |
| y they're well-informed that turning | 10:26:14 | |
| | Page 43 | |
| | And what was the purpose of the call that ed with? To inform the utilities, provide a to the utilities on what I briefed Nik on, which was the conditions, fire as on the landscape and the potential for eignitions from utilities. And was it conveyed to the utilities that de-energized their lines they can avoid tential fire ignitions? Yes. That would have been clear. Okay. Because otherwise what would be the the call. Right? Correct. Did you feel it was made clear to the in the call that they were being it to de-energize their lines to avoid fire as? I feel like that meeting that the shad a that message was clear to them, | And what was the purpose of the call that 10:25:04 To inform the utilities, provide a 10:25:04 to the utilities on what I briefed Nik 10:25:11 con, which was the conditions, fire 10:25:25 In so n the landscape and the potential for 10:25:21 10:25:25 And was it conveyed to the utilities that 10:25:30 Ide-energized their lines they can avoid 10:25:37 Yes. That would have been clear. 10:25:39 Okay. Because otherwise what would be the the call. Right? Correct. Did you feel it was made clear to the s in the call that they were being d to de-energize their lines to avoid fire 10:25:59 I feel like that meeting that the s had a that message was clear to them, 10:26:10 |

| new ignitions across the State of Oregon. Q. How long did the call last? A. Fifteen minutes. In that range. I don't lo:26:36 know specifically. Felt like about that. Q. Did anyone from the state, and by the state lo:26:48 lo:26:49 lo:27:09 lo:26:49 lo:27:09 lo:27:14 lo: | | |

I believe there was an introduction from 10:27:09 I recall it as an introduction from Nik Blosser, 10:27:14 a briefing from me, and then conversation between 10:27:18 myself, Nik and the three utilities. 10:27:22 Q. Okay. When it was conveyed to the 10:27:25 atilities that if they de-energized their lines 10:27:28 that could help prevent further power line caused 10:27:32 ignitions, what was the response from the 10:27:36 atilities? 10:27:39 A. They wanted to know where existing fires 10:27:40 were occurring. They wanted to know how many 10:27:45 Fires, how significant were they, were they large 10:27:49 Fires, where are they at, and where's the greatest 10:27:56 potential for risk of future fires by utilities. 10:28:00 Q. Did you provide that information? 10:28:09 A. I described the threat as significant from 10:28:12 | I'm referring to your office, the governor's | 10:26:59 |
| A. I believe there was an introduction from 10:27:09 I recall it as an introduction from Nik Blosser, 10:27:14 a briefing from me, and then conversation between 10:27:18 myself, Nik and the three utilities. 10:27:22 Q. Okay. When it was conveyed to the 10:27:25 utilities that if they de-energized their lines 10:27:28 that could help prevent further power line caused 10:27:32 ignitions, what was the response from the 10:27:36 utilities? 10:27:39 A. They wanted to know where existing fires 10:27:40 were occurring. They wanted to know how many 10:27:45 fires, how significant were they, were they large 10:27:49 fires, where are they at, and where's the greatest 10:27:56 potential for risk of future fires by utilities. 10:28:00 Q. Did you provide that information? 10:28:09 A. I described the threat as significant from 10:28:12 | office, anyone other than you and Nik Blosser | 10:27:02 |
| a briefing from me, and then conversation between 10:27:18 myself, Nik and the three utilities. 10:27:22 Q. Okay. When it was conveyed to the 10:27:25 utilities that if they de-energized their lines 10:27:28 that could help prevent further power line caused 10:27:32 dignitions, what was the response from the 10:27:36 utilities? 10:27:39 A. They wanted to know where existing fires 10:27:40 were occurring. They wanted to know how many 10:27:45 fires, how significant were they, were they large 10:27:49 fires, where are they at, and where's the greatest 10:27:56 potential for risk of future fires by utilities. 10:28:00 Q. Did you provide that information? 10:28:09 A. I described the threat as significant from 10:28:12 | speak? | 10:27:05 |
| myself, Nik and the three utilities. Q. Okay. When it was conveyed to the 10:27:28 atilities that if they de-energized their lines 10:27:28 atilities, what was the response from the 10:27:32 atilities? A. They wanted to know where existing fires 10:27:40 were occurring. They wanted to know how many 10:27:45 atires, how significant were they, were they large 10:27:49 atires, where are they at, and where's the greatest 10:27:56 atires, opening the provide that information? 10:28:00 A. I described the threat as significant from 10:28:12 | A. I believe there was an introduction from | 10:27:09 |
| Q. Okay. When it was conveyed to the 10:27:25 utilities that if they de-energized their lines 10:27:28 utilities that if they de-energized their lines 10:27:28 utilities that ould help prevent further power line caused 10:27:32 uignitions, what was the response from the 10:27:36 utilities? 10:27:39 A. They wanted to know where existing fires 10:27:40 were occurring. They wanted to know how many 10:27:45 fires, how significant were they, were they large 10:27:49 fires, where are they at, and where's the greatest 10:27:56 potential for risk of future fires by utilities. 10:28:00 Q. Did you provide that information? 10:28:09 A. I described the threat as significant from 10:28:12 | I recall it as an introduction from Nik Blosser, | 10:27:14 |
| Q. Okay. When it was conveyed to the 10:27:25 utilities that if they de-energized their lines 10:27:28 that could help prevent further power line caused 10:27:32 ignitions, what was the response from the 10:27:36 utilities? 10:27:39 A. They wanted to know where existing fires 10:27:40 were occurring. They wanted to know how many 10:27:45 fires, how significant were they, were they large 10:27:49 fires, where are they at, and where's the greatest 10:27:56 potential for risk of future fires by utilities. 10:28:00 Q. Did you provide that information? 10:28:09 A. I described the threat as significant from 10:28:12 | a briefing from me, and then conversation between | 10:27:18 |
| that could help prevent further power line caused ignitions, what was the response from the utilities? A. They wanted to know where existing fires were occurring. They wanted to know how many fires, how significant were they, were they large fires, where are they at, and where's the greatest potential for risk of future fires by utilities. Q. Did you provide that information? A. I described the threat as significant from 10:27:28 10:27:32 10:27:36 10:27:39 10:27:40 10:27:40 10:27:45 10:27:45 10:27:45 10:27:49 10:27:56 10:28:00 10:28:00 | myself, Nik and the three utilities. | 10:27:22 |
| that could help prevent further power line caused ignitions, what was the response from the utilities? A. They wanted to know where existing fires were occurring. They wanted to know how many fires, how significant were they, were they large fires, where are they at, and where's the greatest potential for risk of future fires by utilities. Q. Did you provide that information? A. I described the threat as significant from 10:27:32 10:27:32 10:27:36 10:27:39 10:27:49 10:27:40 10:27:45 10:27:45 10:27:49 10:27:49 10:27:56 10:28:00 10:28:09 | Q. Okay. When it was conveyed to the | 10:27:25 |
| ignitions, what was the response from the 10:27:36 attilities? 10:27:39 A. They wanted to know where existing fires were occurring. They wanted to know how many fires, how significant were they, were they large fires, where are they at, and where's the greatest potential for risk of future fires by utilities. Q. Did you provide that information? 10:28:09 A. I described the threat as significant from 10:28:12 | utilities that if they de-energized their lines | 10:27:28 |
| A. They wanted to know where existing fires 10:27:40 were occurring. They wanted to know how many 10:27:45 fires, how significant were they, were they large 10:27:49 fires, where are they at, and where's the greatest 10:27:56 potential for risk of future fires by utilities. 10:28:00 Q. Did you provide that information? 10:28:09 A. I described the threat as significant from 10:28:12 | that could help prevent further power line caused | 10:27:32 |
| A. They wanted to know where existing fires 10:27:40 were occurring. They wanted to know how many 10:27:45 fires, how significant were they, were they large 10:27:49 fires, where are they at, and where's the greatest 10:27:56 potential for risk of future fires by utilities. 10:28:00 Q. Did you provide that information? 10:28:09 A. I described the threat as significant from 10:28:12 | ignitions, what was the response from the | 10:27:36 |
| were occurring. They wanted to know how many fires, how significant were they, were they large fires, where are they at, and where's the greatest potential for risk of future fires by utilities. Q. Did you provide that information? A. I described the threat as significant from 10:27:45 10:27:45 10:27:45 10:27:45 10:27:45 10:27:45 10:27:45 10:27:45 10:27:45 10:27:45 10:27:45 10:27:45 10:27:45 10:27:45 10:27:45 | utilities? | 10:27:39 |
| fires, how significant were they, were they large 10:27:49 fires, where are they at, and where's the greatest 10:27:56 potential for risk of future fires by utilities. 10:28:00 Q. Did you provide that information? 10:28:09 A. I described the threat as significant from 10:28:12 | A. They wanted to know where existing fires | 10:27:40 |
| fires, where are they at, and where's the greatest 10:27:56 potential for risk of future fires by utilities. 10:28:00 Q. Did you provide that information? 10:28:09 A. I described the threat as significant from 10:28:12 | were occurring. They wanted to know how many | 10:27:45 |
| Q. Did you provide that information? 10:28:00 A. I described the threat as significant from 10:28:12 | fires, how significant were they, were they large | 10:27:49 |
| Q. Did you provide that information? 10:28:09 A. I described the threat as significant from 10:28:12 | fires, where are they at, and where's the greatest | 10:27:56 |
| A. I described the threat as significant from 10:28:12 | potential for risk of future fires by utilities. | 10:28:00 |
| | Q. Did you provide that information? | 10:28:09 |
| Page 44 | A. I described the threat as significant from | 10:28:12 |
| | | Page 44 |

| the crest of the Cascades west. The event was | 10:28:17 |
|---|----------|
| statewide. We had already experienced a new | 10:28:22 |
| ignition in southeast Oregon, Klamath. So the | 10:28:27 |
| potential was statewide but in particular the | 10:28:32 |
| downslope winds in the canyons is where we were | 10:28:35 |
| going to see the greatest wind velocities and thus | 10:28:38 |
| potential for tree failures, limb failures and | 10:28:43 |
| potential for power line related fires. | 10:28:45 |
| So I expressed what I knew of the existing | 10:28:50 |
| fires on the ground, what we were operating on, and | 10:28:55 |
| where the threat was. So yes, I answered those | 10:29:00 |
| questions the best I could. | 10:29:04 |
| Q. Okay. And was it conveyed to the utilities | 10:29:05 |
| that the threat that you described could be | 10:29:08 |
| mitigated if they de-energized their lines in those | 10:29:11 |
| areas? | 10:29:14 |
| A. Absolutely. | 10:29:14 |
| Q. Okay. Now there were three utilities on | 10:29:15 |
| the call. Correct? BPA, PacifiCorp and PGE. | 10:29:20 |
| A. Affirmative. | 10:29:24 |
| Q. Did PacifiCorp agree to de-energize its | 10:29:25 |
| lines during that call? | 10:29:30 |
| A. During the call nobody indicated that they | 10:29:32 |
| were going to initiate a public safety power | 10:29:42 |
| shutoff other than, my recall, was that acknowledge | 10:29:45 |
| | Page 45 |
| | |

| at that | time that the Columbia Gorge was shut off, | 10:29:53 |
|----------|---|----------|
| if I'm 3 | remembering that correctly. | 10:29:58 |
| Q. | And that was PGE. Right? Portland | 10:30:00 |
| General. | | 10:30:03 |
| Α. | Correct. | 10:30:03 |
| Q. | What did PacifiCorp say - again, Nik | 10:30:04 |
| Blosser | s notes indicate it was Scott Bolton, and | 10:30:10 |
| that's w | what Nik told us, too - what did PacifiCorp | 10:30:11 |
| say abou | at what they were doing with respect to | 10:30:14 |
| power sh | utoffs to avoid wildfire ignitions at that | 10:30:17 |
| point? | | 10:30:21 |
| A. | I do not recall any specifics around any | 10:30:21 |
| analytic | s that they were working through to | 10:30:30 |
| determin | e any thresholds that would trigger public | 10:30:31 |
| safety p | oower shutoff. | 10:30:36 |
| Q. | Did they did PacifiCorp's representative | 10:30:39 |
| provide | you with any information that they had as | 10:30:42 |
| far as w | that they were looking at power | 10:30:45 |
| shutoff- | related? | 10:30:49 |
| A. | No. | 10:30:50 |
| | MR. GRANT: Counsel, it's been an hour, | 10:30:56 |
| could we | take a break here? | 10:30:58 |
| | MR. DOW: Good time for a break. | 10:30:59 |
| | (RECESS is taken, 10:30 to 10:47 a.m.) | 10:31:02 |
| BY MR. D | OOW: | 10:31:02 |
| | | Page 46 |

| Q. Doug, do you recall - this is not a test - 10:47:39 approximately how many acres statewide were burned 10:47:43 because of the Labor Day fires? 10:47:49 A. Just over a million acres. 10:47:51 Q. Do you have an approximate recollection of, 10:47:54 in general, of lives lost in the state because of 10:47:58 the fires? 10:48:00 A. Nine lives lost. 10:48:01 Q. How about an approximate recollection of 10:48:03 properties destroyed? Structures destroyed. 10:48:07 A. Between four and five thousand structures. 10:48:10 Q. Do you recall, during the call with the 10:48:15 utilities on the 7th, Nik Blosser being frustrated 10:48:19 because the utilities, PacifiCorp in particular, 10:48:24 were not committing to do power shutoffs to prevent 10:48:30 powerline-caused ignitions? 10:48:36 meeting I didn't see frustration or hear 10:48:39 frustration. It was a professional conversation 10:48:42 and I didn't take note of any frustrated at the 10:48:50 meeting because he wasn't getting commitments from 10:48:53 PacifiCorp to de-energize. Did he convey his 10:48:57 frustration to you other than in the meeting? 10:49:02 A. After the meeting at some point I don't 10:49:05 Page 47 | | | |
|--|----|---|----------|
| because of the Labor Day fires? A. Just over a million acres. Q. Do you have an approximate recollection of, 10:47:54 in general, of lives lost in the state because of 10:47:58 the fires? A. Nine lives lost. Q. How about an approximate recollection of 10:48:03 properties destroyed? Structures destroyed. A. Between four and five thousand structures. Q. Do you recall, during the call with the 10:48:15 utilities on the 7th, Nik Blosser being frustrated 10:48:19 because the utilities, PacifiCorp in particular, 10:48:30 powerline-caused ignitions? A. I don't recall anyone being - at the 10:48:39 frustration. It was a professional conversation 10:48:42 and I didn't take note of any frustrated at the 10:48:53 PacifiCorp to de-energize. Did he convey his 10:48:57 frustration to you other than in the meeting? 10:49:05 A. After the meeting at some point I don't 10:49:05 | 1 | Q. Doug, do you recall - this is not a test - | 10:47:39 |
| A. Just over a million acres. Q. Do you have an approximate recollection of, 10:47:54 in general, of lives lost in the state because of 10:47:58 the fires? 10:48:00 A. Nine lives lost. 10:48:01 Q. How about an approximate recollection of 10:48:03 properties destroyed? Structures destroyed. 10:48:07 A. Between four and five thousand structures. 10:48:10 Q. Do you recall, during the call with the 10:48:15 utilities on the 7th, Nik Blosser being frustrated 10:48:19 the because the utilities, PacifiCorp in particular, 10:48:24 were not committing to do power shutoffs to prevent 10:48:30 powerline-caused ignitions? 10:48:35 A. I don't recall anyone being - at the 10:48:36 meeting I didn't see frustration or hear 10:48:42 and I didn't take note of any frustrations. 10:48:46 Q. Nik told us that he was frustrated at the 10:48:50 meeting because he wasn't getting commitments from 10:48:57 frustration to you other than in the meeting? 10:49:02 A. After the meeting at some point I don't 10:49:05 | 2 | approximately how many acres statewide were burned | 10:47:43 |
| Q. Do you have an approximate recollection of, 10:47:54 in general, of lives lost in the state because of 10:47:58 the fires? 10:48:00 A. Nine lives lost. 10:48:01 Q. How about an approximate recollection of 10:48:03 properties destroyed? Structures destroyed. 10:48:07 A. Between four and five thousand structures. 10:48:10 Q. Do you recall, during the call with the 10:48:15 utilities on the 7th, Nik Blosser being frustrated 10:48:19 because the utilities, PacifiCorp in particular, 10:48:24 were not committing to do power shutoffs to prevent 10:48:30 powerline-caused ignitions? 10:48:36 A. It was a professional conversation 10:48:42 and I didn't take note of any frustrations. 10:48:46 Q. Nik told us that he was frustrated at the 10:48:50 meeting because he wasn't getting commitments from 10:48:53 PacifiCorp to de-energize. Did he convey his 10:48:57 frustration to you other than in the meeting? 10:49:02 A. After the meeting at some point I don't 10:49:05 | 10 | properties destroyed? Structures destroyed. | 10:48:07 |
| utilities on the 7th, Nik Blosser being frustrated 10:48:19 because the utilities, PacifiCorp in particular, were not committing to do power shutoffs to prevent powerline-caused ignitions? 10:48:35 A. I don't recall anyone being - at the meeting I didn't see frustration or hear frustration. It was a professional conversation and I didn't take note of any frustrations. Q. Nik told us that he was frustrated at the meeting because he wasn't getting commitments from pacifiCorp to de-energize. Did he convey his frustration to you other than in the meeting? A. After the meeting at some point I don't 10:48:19 10:48:24 10:48:35 10:48:36 10:48:39 10:48:42 20 and I didn't take note of any frustrations. 10:48:46 21 Q. Nik told us that he was frustrated at the 10:48:50 22 frustration to you other than in the meeting? 10:49:02 | 11 | A. Between four and five thousand structures. | 10:48:10 |
| because the utilities, PacifiCorp in particular, 10:48:24 were not committing to do power shutoffs to prevent 10:48:30 powerline-caused ignitions? 10:48:35 A. I don't recall anyone being - at the 10:48:36 meeting I didn't see frustration or hear 10:48:39 frustration. It was a professional conversation 10:48:42 and I didn't take note of any frustrations. 10:48:46 Q. Nik told us that he was frustrated at the 10:48:50 meeting because he wasn't getting commitments from 10:48:53 PacifiCorp to de-energize. Did he convey his 10:48:57 frustration to you other than in the meeting? 10:49:02 A. After the meeting at some point I don't 10:49:05 | 12 | Q. Do you recall, during the call with the | 10:48:15 |
| were not committing to do power shutoffs to prevent 10:48:30 powerline-caused ignitions? 10:48:35 A. I don't recall anyone being - at the 10:48:36 meeting I didn't see frustration or hear 10:48:39 frustration. It was a professional conversation 10:48:42 and I didn't take note of any frustrations. 10:48:46 Q. Nik told us that he was frustrated at the 10:48:50 meeting because he wasn't getting commitments from 10:48:53 PacifiCorp to de-energize. Did he convey his 10:48:57 frustration to you other than in the meeting? 10:49:02 A. After the meeting at some point I don't 10:49:05 | 13 | utilities on the 7th, Nik Blosser being frustrated | 10:48:19 |
| powerline-caused ignitions? A. I don't recall anyone being - at the 10:48:36 meeting I didn't see frustration or hear 10:48:39 frustration. It was a professional conversation 10:48:42 and I didn't take note of any frustrations. 10:48:46 Q. Nik told us that he was frustrated at the 10:48:50 meeting because he wasn't getting commitments from 10:48:53 PacifiCorp to de-energize. Did he convey his 10:48:57 frustration to you other than in the meeting? 10:49:02 A. After the meeting at some point I don't 10:49:05 | 14 | because the utilities, PacifiCorp in particular, | 10:48:24 |
| A. I don't recall anyone being - at the 10:48:36 meeting I didn't see frustration or hear 10:48:39 frustration. It was a professional conversation 10:48:42 and I didn't take note of any frustrations. 10:48:46 Q. Nik told us that he was frustrated at the 10:48:50 meeting because he wasn't getting commitments from 10:48:53 PacifiCorp to de-energize. Did he convey his 10:48:57 frustration to you other than in the meeting? 10:49:02 A. After the meeting at some point I don't 10:49:05 | 15 | were not committing to do power shutoffs to prevent | 10:48:30 |
| meeting I didn't see frustration or hear 10:48:39 frustration. It was a professional conversation 10:48:42 and I didn't take note of any frustrations. 10:48:46 Q. Nik told us that he was frustrated at the 10:48:50 meeting because he wasn't getting commitments from 10:48:53 PacifiCorp to de-energize. Did he convey his frustration to you other than in the meeting? A. After the meeting at some point I don't 10:49:05 | 16 | powerline-caused ignitions? | 10:48:35 |
| frustration. It was a professional conversation 10:48:42 and I didn't take note of any frustrations. 10:48:46 Q. Nik told us that he was frustrated at the 10:48:50 meeting because he wasn't getting commitments from 10:48:53 PacifiCorp to de-energize. Did he convey his 10:48:57 frustration to you other than in the meeting? 10:49:02 A. After the meeting at some point I don't 10:49:05 | 17 | A. I don't recall anyone being - at the | 10:48:36 |
| and I didn't take note of any frustrations. Q. Nik told us that he was frustrated at the 10:48:50 meeting because he wasn't getting commitments from 10:48:53 PacifiCorp to de-energize. Did he convey his 10:48:57 frustration to you other than in the meeting? 10:49:02 A. After the meeting at some point I don't 10:49:05 | 18 | meeting I didn't see frustration or hear | 10:48:39 |
| Q. Nik told us that he was frustrated at the 10:48:50 meeting because he wasn't getting commitments from 10:48:53 PacifiCorp to de-energize. Did he convey his 10:48:57 frustration to you other than in the meeting? 10:49:02 A. After the meeting at some point I don't 10:49:05 | 19 | frustration. It was a professional conversation | 10:48:42 |
| meeting because he wasn't getting commitments from 10:48:53 PacifiCorp to de-energize. Did he convey his 10:48:57 frustration to you other than in the meeting? 10:49:02 A. After the meeting at some point I don't 10:49:05 | 20 | and I didn't take note of any frustrations. | 10:48:46 |
| PacifiCorp to de-energize. Did he convey his 10:48:57 frustration to you other than in the meeting? 10:49:02 A. After the meeting at some point I don't 10:49:05 | 21 | Q. Nik told us that he was frustrated at the | 10:48:50 |
| frustration to you other than in the meeting? 10:49:02 A. After the meeting at some point I don't 10:49:05 | 22 | meeting because he wasn't getting commitments from | 10:48:53 |
| A. After the meeting at some point I don't 10:49:05 | 23 | PacifiCorp to de-energize. Did he convey his | 10:48:57 |
| | 24 | frustration to you other than in the meeting? | 10:49:02 |
| Page 47 | 25 | A. After the meeting at some point I don't | 10:49:05 |
| | | | Page 47 |

| recall i | f we chatted, I suspect we would have | 10:49:09 |
|----------|---|----------|
| briefed | directly after, but at the end of the | 10:49:14 |
| meeting | when we hung up and I moved on I shared I | 10:49:19 |
| was disc | ouraged based on the conversation. | 10:49:26 |
| Q. | Why were you discouraged? | 10:49:29 |
| Α. | I was hoping for a more proactive | 10:49:31 |
| conversa | tion about these are the things we're | 10:49:36 |
| looking | at, don't worry, Doug, we've got this. | 10:49:40 |
| We're pa | ying attention to this. Here's our | 10:49:43 |
| threshol | ds. Here's what our data says about winds | 10:49:46 |
| in diffe | rent areas of the state and we're | 10:49:49 |
| consider | ing power shutoff here or there if we if | 10:49:54 |
| it eleva | tes another ten degrees, 20 degrees, | 10:49:58 |
| whatever | those thresholds would be based on | 10:50:01 |
| whatever | experience they have in terms of damage to | 10:50:03 |
| their li | nes. But the tone in the conversation was | 10:50:08 |
| one way. | Where's the fires? Where's the threat? | 10:50:13 |
| Can you | show us that? Can you bring to bear that | 10:50:17 |
| informat | ion? As opposed to a joint conversation | 10:50:20 |
| recognit | ion of the risk and proactive conversation, | 10:50:29 |
| how can | we help, what's our role in this. I didn't | 10:50:32 |
| see a se | nse at that moment, right, at an evening | 10:50:38 |
| call, th | at there was an active engagement and | 10:50:43 |
| consider | ation ongoing of thresholds for public | 10:50:49 |
| | | |
| safety p | ower shutoffs. So at the end of the call I | 10:50:53 |

| 1 | was discouraged myself. I can't speak for Nik. I | 10:50:56 |
|----|--|----------|
| 2 | don't recall he and I him stating that to me | 10:51:01 |
| 3 | after or during. | 10:51:04 |
| 4 | Q. Did you and Nik have a separate | 10:51:06 |
| 5 | conversation or call then after the call with the | 10:51:09 |
| 6 | utilities? | 10:51:11 |
| 7 | A. I don't recall. I would have been with | 10:51:11 |
| 8 | the governor and the governor's office every day | 10:51:21 |
| 9 | for - and maybe multiple times throughout - | 10:51:22 |
| 10 | certainly the 72 hours of the event and beyond | 10:51:29 |
| 11 | obviously because it carried forward for another | 10:51:34 |
| 12 | month long of fire activities. But I don't recall | 10:51:39 |
| 13 | specifically if we had one immediately after that | 10:51:42 |
| 14 | or not. | 10:51:50 |
| 15 | Q. In light of the destruction that those | 10:51:51 |
| 16 | fires caused have you ever thought since then if | 10:51:55 |
| 17 | the utilities, namely PacifiCorp, had de-energized | 10:52:00 |
| 18 | their lines as requested in that call that much of | 10:52:04 |
| 19 | the Labor Day fire destruction might have been | 10:52:07 |
| 20 | avoided? | 10:52:10 |
| 21 | MS. ZIAO: Object that it mischaracterizes | 10:52:13 |
| 22 | testimony about the call and assumes facts. | 10:52:16 |
| 23 | Q. You can answer. | 10:52:20 |
| 24 | A. Can you repeat the question? | 10:52:21 |
| 25 | Q. Sure. Since then and in light of all the | 10:52:26 |
| | | Page 49 |

| 1 | Q. But you are still involved, maybe even | 10:54:17 |
|----|---|----------|
| 2 | moreso, in wildfire prevention, fire mitigation | 10:54:19 |
| 3 | efforts. Correct? | 10:54:24 |
| 4 | A. Affirmative. | 10:54:25 |
| 5 | Q. To what extent does the Labor Day 2020 | 10:54:25 |
| 6 | experience and the absence of the PSPS power | 10:54:35 |
| 7 | shutoffs as requested stand out as a lesson | 10:54:41 |
| 8 | learned, i.e. something to be avoided going forward | 10:54:44 |
| 9 | as you try to prevent future wildfires? | 10:54:49 |
| 10 | A. That's a significant lesson learned. | 10:54:53 |
| 11 | Q. How so? | 10:54:59 |
| 12 | A. I mean, you would have to go back to the | 10:55:01 |
| 13 | record on how many causes were actually from wind | 10:55:06 |
| 14 | and utilities in those events and you start to look | 10:55:15 |
| 15 | at those fires and say those wouldn't have existed | 10:55:18 |
| 16 | if we hadn't, you know, no energized lines in those | 10:55:21 |
| 17 | spaces. It's significant. But that's what I would | 10:55:26 |
| 18 | offer, those are the things I think about. Haven't | 10:55:30 |
| 19 | done that calculation. | 10:55:34 |
| 20 | Q. I'm going to introduce an exhibit here. | 10:55:37 |
| 21 | (EXHIBIT marked. Exhibit 055-001.) | 10:56:02 |
| 22 | Q. Doug, you're the 55th witness in this case | 10:56:03 |
| 23 | so you're exhibits are all marked with the number | 10:56:07 |
| 24 | 55. Just give me a moment because I'm going to | 10:56:11 |
| 25 | introduce this online to the folks who are joining | 10:56:20 |
| | | Page 51 |

| 1 | A. I do not recall. | 10:58:20 |
|----|--|----------|
| 2 | Q. Do you recall if you texted Nik at all | 10:58:22 |
| 3 | during that call? | 10:58:26 |
| 4 | A. I don't recall. | 10:58:27 |
| 5 | Q. Do you have any other than not being | 10:58:28 |
| 6 | able to recall, do you have any reason to dispute | 10:58:32 |
| 7 | that you would have texted him "great question" at | 10:58:35 |
| 8 | 8:23 p.m.? | 10:58:38 |
| 9 | A. No reason. | 10:58:39 |
| 10 | Q. Okay. And do you recall Nik saying | 10:58:40 |
| 11 | something in general like what is quoted in his | 10:58:44 |
| 12 | personal journal here? | 10:58:47 |
| 13 | A. Could you ask that again? Are you | 10:58:52 |
| 14 | referencing what you read or | 10:58:55 |
| 15 | Q. Yeah. Good question. My apologies for | 10:58:56 |
| 16 | being confusing. | 10:58:59 |
| 17 | The quote on the first three lines of the | 10:58:59 |
| 18 | journal entry about our fire chief telling us he's | 10:59:03 |
| 19 | worried about power lines starting fires, do you | 10:59:06 |
| 20 | recall Nik saying something to that effect to the | 10:59:10 |
| 21 | utilities and that's why we assembled you here on | 10:59:12 |
| 22 | this call? | 10:59:15 |
| 23 | A. Yes. That seems consistent with what I | 10:59:15 |
| 24 | remember of the conversation. | 10:59:19 |
| 25 | Q. Okay. | 10:59:19 |
| | | Page 53 |

| 1 | A. And the purpose of the call. | 10:59:20 |
|----|--|----------|
| 2 | Q. Okay. And then he noted that the call | 10:59:22 |
| 3 | ended around 8:31 p.m. when he said: That's | 10:59:27 |
| 4 | probably as far as we can go tonight. Or: I think | 10:59:30 |
| 5 | that's as far as we can go tonight. Is that | 10:59:33 |
| 6 | consistent with your recollection of when the call | 10:59:35 |
| 7 | ended? | 10:59:38 |
| 8 | A. That would be consistent because I think I | 10:59:39 |
| 9 | mentioned it felt like about 15 minutes. | 10:59:41 |
| 10 | Q. And Nik wrote at the bottom: Will never | 10:59:44 |
| 11 | forget that conversation on September 7. | 10:59:47 |
| 12 | Have you ever forgotten that conversation | 10:59:52 |
| 13 | with the utilities? | 10:59:54 |
| 14 | A. No. | 10:59:55 |
| 15 | Q. Why do you think it sticks in your mind? | 10:59:56 |
| 16 | A. That was a really powerful evening. A lot | 10:59:59 |
| 17 | of it was a catastrophic event and that was one | 11:00:07 |
| 18 | of the key conversations that I had that evening. | 11:00:13 |
| 19 | Q. Nik described it to us as his greatest | 11:00:25 |
| 20 | failure in the governor's office not being able to | 11:00:31 |
| 21 | be successful on that call in convincing the | 11:00:36 |
| 22 | utilities, namely PacifiCorp, to proactively | 11:00:40 |
| 23 | de-energize their lines to avoid power line fire | 11:00:44 |
| 24 | ignitions. How would you describe it in terms of | 11:00:46 |
| 25 | your role as chief of fire protection in not being | 11:00:54 |
| | | Page 54 |

| able to | convince them in that call to de-energize | 11:00:57 |
|-----------|---|----------|
| their por | wer lines to avoid power line-caused fire | 11:00:59 |
| ignitions | s? | 11:01:02 |
| | MS. ZIAO: Object that the question assumes | 11:01:04 |
| facts. | | 11:01:10 |
| A. | Can you repeat the question? | 11:01:12 |
| Q. | Sure. You heard what I said about Nik | 11:01:13 |
| describin | ng his greatest failure. | 11:01:19 |
| A. | Yes. | 11:01:20 |
| Q. | How would you describe it in your role as | 11:01:20 |
| chief of | fire protection in not being successful in | 11:01:22 |
| convinci | ng the utilities in that call to | 11:01:26 |
| de-energi | ize their power lines to void power | 11:01:30 |
| line-caus | sed ignitions? | 11:01:33 |
| Α. | I have a lot of emotions on that call. I | 11:01:36 |
| felt like | e I was doing my due diligence to elevate | 11:01:39 |
| the conve | ersation to decision-makers, so I'm pleased | 11:01:42 |
| that I di | id the work to inform decision-makers on | 11:01:47 |
| this. I | know that's a difficult decision to shut | 11:01:53 |
| off power | There's other factors involved there. | 11:01:58 |
| I feel li | ike from my role I did my part in informing | 11:02:07 |
| those ult | imate decisions. I will reiterate I did | 11:02:16 |
| I was | discouraged at the end of it because I | 11:02:19 |
| didn't se | ee a pathway immediately. I didn't gain | 11:02:25 |
| confidenc | ce immediately that utilities were to take | 11:02:31 |
| | | Page 55 |

| 1 | action on public safety power shutoffs more broadly | 11:02:34 |
|----|---|----------|
| 2 | across the state and I knew that potential for | 11:02:38 |
| 3 | additional fires was to continue over the next | 11:02:42 |
| 4 | 60-plus hours at that point. | 11:02:47 |
| 5 | Q. This may seem like an obvious question but | 11:02:49 |
| 6 | do you wish you had convinced them and gained the | 11:02:54 |
| 7 | commitment from them, the utilities that is, to | 11:02:59 |
| 8 | de-energize their power lines in that call to | 11:03:02 |
| 9 | prevent powerline-caused ignitions? | 11:03:04 |
| 10 | A. Yeah, I would have loved to see more | 11:03:07 |
| 11 | public safety power shutoffs implemented across the | 11:03:11 |
| 12 | state. | 11:03:18 |
| 13 | Q. Did you provide either Nik Blosser or | 11:03:19 |
| 14 | anybody else a written summary, whether by text, | 11:03:22 |
| 15 | e-mail, et cetera, of the fire danger and the need | 11:03:28 |
| 16 | for PSPS that night? | 11:03:33 |
| 17 | MR. GRANT: Can you clarify that? | 11:03:37 |
| 18 | MR. DOW: Sure. That was a confusion | 11:03:38 |
| 19 | question. | 11:03:40 |
| 20 | MR. GRANT: Two parts to it. | 11:03:40 |
| 21 | Q. Okay. Did you provide Nik Blosser with any | 11:03:41 |
| 22 | written summary as to the severity of the fire | 11:03:44 |
| 23 | danger on September 7, 2020? | 11:03:48 |
| 24 | A. Yes. At 1100 hours-ish, somewhere earlier | 11:03:52 |
| 25 | that morning prior to the 1300 call, I would have | 11:03:59 |
| | | Page 56 |

| | W | |
|----|--|----------|
| 1 | sent a broad e-mail to all legislators in Oregon, | 11:04:04 |
| 2 | governor's office, colleagues in my listserv, | 11:04:15 |
| 3 | essentially those engaged in wildfire, an e-mail | 11:04:22 |
| 4 | that described the potential that was to come to | 11:04:26 |
| 5 | Oregon that evening and that was sparked by two | 11:04:30 |
| 6 | things. It's typical for me to send an | 11:04:35 |
| 7 | all-legislative e-mail throughout the fire season | 11:04:38 |
| 8 | to inform Oregon around the potential threat | 11:04:42 |
| 9 | adjustments during fire season. I typically send | 11:04:49 |
| 10 | about eight all-call e-mails, I'll call them, to | 11:04:52 |
| 11 | the legislature, the beginning of fire season, the | 11:04:56 |
| 12 | end, and depending on significant activity | 11:04:58 |
| 13 | throughout the season. And chief of staff Nik | 11:05:01 |
| 14 | Blosser would have been on that e-mail list as | 11:05:06 |
| 15 | executive branch leadership. So I would have cc'd | 11:05:11 |
| 16 | a big group. | 11:05:15 |
| 17 | But I described the threat at about 1100 | 11:05:16 |
| 18 | hours so that was prior to the 1300 call with all | 11:05:19 |
| 19 | emergency managers. | 11:05:24 |
| 20 | Q. Did you provide any written summary to Nik | 11:05:27 |
| 21 | Blosser or anyone else that day about the need for | 11:05:32 |
| 22 | public safety power shutoffs? | 11:05:35 |
| 23 | A. I don't recall if I identified that as a | 11:05:38 |
| 24 | request within my e-mail. | 11:05:41 |
| 25 | Q. You've described this event as a east wind | 11:05:44 |
| | | Page 57 |

| event. And what is an east wind event? | |
|---|--|
| event. And what is an east wind event: | 11:05:52 |
| A. An east wind event is significant wind | 11:05:59 |
| event that comes from the east. These are typical | 11:06:04 |
| events in our fall and they are dry and they bring | 11:06:09 |
| warm weather, so they impact fuel conditions, so | 11:06:13 |
| they take moisture out of fuel conditions to make | 11:06:1 |
| them more readily available for consumption by | 11:06:20 |
| fire, and they drive fire conditions because wind | 11:06:23 |
| is a significant factor in fire behavior. | 11:06:28 |
| Q. Does that you mention that they are | 11:06:32 |
| typical in the fall, does that also apply on a date | 11:06:35 |
| like September 7? | 11:06:38 |
| A. Not specific to any date. But September, | 11:06:39 |
| | |
| October, November are typical months that we're | 11:06:44 |
| October, November are typical months that we're really paying attention to the weather conditions | 11:06:48 |
| | |
| really paying attention to the weather conditions | 11:06:48 |
| really paying attention to the weather conditions and looking for that forecast of an east wind out | 11:06:48 11:06:53 |
| really paying attention to the weather conditions and looking for that forecast of an east wind out five to seven days so we know how to prepare and | 11:06:48 11:06:53 11:06:59 |
| really paying attention to the weather conditions and looking for that forecast of an east wind out five to seven days so we know how to prepare and organize. | 11:06:48 11:06:53 11:06:59 |
| really paying attention to the weather conditions and looking for that forecast of an east wind out five to seven days so we know how to prepare and organize. Q. How does an east wind event that's | 11:06:48 11:06:53 11:06:53 11:07:04 |
| really paying attention to the weather conditions and looking for that forecast of an east wind out five to seven days so we know how to prepare and organize. Q. How does an east wind event that's downslope coming through the canyons heighten fire | 11:06:48 11:06:53 11:06:59 11:07:04 11:07:08 |
| really paying attention to the weather conditions and looking for that forecast of an east wind out five to seven days so we know how to prepare and organize. Q. How does an east wind event that's downslope coming through the canyons heighten fire risk associated with power lines? | 11:06:48 11:06:53 11:06:59 11:07:04 11:07:08 11:07:14 |
| really paying attention to the weather conditions and looking for that forecast of an east wind out five to seven days so we know how to prepare and organize. Q. How does an east wind event that's downslope coming through the canyons heighten fire risk associated with power lines? A. The connection with potential powerline | 11:06:48 11:06:59 11:07:04 11:07:08 11:07:16 |
| really paying attention to the weather conditions and looking for that forecast of an east wind out five to seven days so we know how to prepare and organize. Q. How does an east wind event that's downslope coming through the canyons heighten fire risk associated with power lines? A. The connection with potential powerline ignition is it increases the potential for | 11:06:48 11:06:53 11:06:53 11:07:04 11:07:08 11:07:16 11:07:16 |

| 1 | powerlines and that creates sparks and the right | 11:07:30 |
|----|---|----------|
| 2 | fuels with that wind behind it can drive fire | 11:07:37 |
| 3 | behavior significantly. | 11:07:40 |
| 4 | Q. Is there a difference between a downslope | 11:07:41 |
| 5 | east wind event in September, October, November and | 11:07:45 |
| 6 | the associated fire risk as compared to wind out of | 11:07:50 |
| 7 | the west? | 11:07:55 |
| 8 | A. Winds out of the west often have a | 11:08:02 |
| 9 | moisture component to it. They are coming off the | 11:08:08 |
| 10 | ocean and what that heightens the risk of lightning | 11:08:10 |
| 11 | conditions because lightning is created from uplift | 11:08:14 |
| 12 | and heat that is from the land so you'll see an | 11:08:18 |
| 13 | uplift and you provide the moisture potential and | 11:08:23 |
| 14 | we have lightning which creates a whole different | 11:08:26 |
| 15 | set of challenges in terms of emergency response. | 11:08:29 |
| 16 | An east wind event typically does not come with | 11:08:33 |
| 17 | lightning. It's really the weather, the wind is | 11:08:37 |
| 18 | the key driver of what drives a red flag warning | 11:08:39 |
| 19 | for that day. | 11:08:43 |
| 20 | Q. Did you come to learn that Portland | 11:08:46 |
| 21 | General, or PGE, did do a PSPS around the Mt. Hood | 11:08:56 |
| 22 | area on September 7 and 8? | 11:09:05 |
| 23 | A. I did come to learn that they initiated a | 11:09:08 |
| 24 | PSPS; I don't recall when I learned it. It may | 11:09:12 |
| 25 | have been at this evening call referenced with Nik | 11:09:17 |
| | | Page 59 |

| 100 | | |
|-----|---|----------|
| 1 | But that's a validation through Oregon Emergency | 11:29:27 |
| 2 | Management. | 11:29:32 |
| 3 | Q. When you said that's a validation through | 11:29:33 |
| 4 | Oregon Emergency Management, what does that mean to | 11:29:37 |
| 5 | a non-government person? | 11:29:38 |
| 6 | A. If you want to just know the roster who | 11:29:39 |
| 7 | gets invited to those calls I can't I would | 11:29:42 |
| 8 | encourage you to connect with the emergency | 11:29:46 |
| 9 | management. | 11:29:48 |
| 10 | Q. You testified a couple times that you | 11:29:48 |
| 11 | testified, I think, I wrote down the word gravity | 11:29:55 |
| .2 | of the situation on September 7. Can you explain | 11:29:57 |
| .3 | to me from your perspective at least what you | 11:30:02 |
| .4 | remember that gravity as being? | 11:30:04 |
| .5 | A. The evening of the 6th, so on the briefing | 11:30:09 |
| 6 | we received at 1600 we would have been informed at | 11:30:19 |
| 7 | the multi-agency coordination group that it's an | 11:30:25 |
| 8 | extreme event. So that's number one. It's not a | 11:30:30 |
| 9 | moderate east wind event. This is going to be very | 11:30:36 |
| 0 | significant. That prompted my initiation of the | 11:30:39 |
| 1 | Oregon emergency response system 1300 the following | 11:30:43 |
| 2 | day. | 11:30:48 |
| 3 | But it was watching the event take place | 11:30:49 |
| 4 | in Washington that sparked me to type an e-mail for | 11:30:53 |
| 5 | my listserv and the legislators because you could | 11:31:01 |
| | | Page 64 |

| see the reality of the situation coming into play | |
|--|--|
| | 11:31:04 |
| in Washington and as that front moves south and | 11:31:0 |
| into Oregon you could expect similar fire activity. | 11:31:12 |
| And there was a fire, a new fire start in | 11:31:10 |
| Washington; I believe it ran in the range of 50 | 11:31:2 |
| miles that day, that morning. So we had some | 11:31:24 |
| sense. And that's in eastern Oregon and lighted | 11:31:29 |
| fuels, different conditions than what we faced for | 11:31:33 |
| the crest of the Cascade west, but however it gives | 11:31:35 |
| an early indication of what we're predicting in the | 11:31:37 |
| weather is landing in reality of fire behavior for | 11:31:42 |
| the day. | 11:31:46 |
| So that was one. When you say gravity of | 11:31:46 |
| the situation, that it resonated with, you know, | 11:31:49 |
| | |
| that morning, yup, it's a significant event that | 11:31:53 |
| that morning, yup, it's a significant event that puts life safety paramount as our mission. | 11:31:53 11:31:57 |
| | 11:31:57 |
| puts life safety paramount as our mission. | 11:31:57 |
| puts life safety paramount as our mission. Q. When it comes to the fire that weekend was | 11:31:57 |
| puts life safety paramount as our mission. Q. When it comes to the fire that weekend was there one particular person or agency that was | 11:31:57 11:32:03 11:32:10 |
| Q. When it comes to the fire that weekend was there one particular person or agency that was responsible for trying to anticipate fire behavior? | 11:31:57 11:32:03 11:32:10 11:32:12 |
| Q. When it comes to the fire that weekend was there one particular person or agency that was responsible for trying to anticipate fire behavior? In other words, what that fire was going to do. | 11:31:57 11:32:03 11:32:10 11:32:12 |
| Q. When it comes to the fire that weekend was there one particular person or agency that was responsible for trying to anticipate fire behavior? In other words, what that fire was going to do. A. Which fire? | 11:31:57 11:32:03 11:32:10 11:32:12 11:32:17 11:32:23 |
| Q. When it comes to the fire that weekend was there one particular person or agency that was responsible for trying to anticipate fire behavior? In other words, what that fire was going to do. A. Which fire? MR. GRANT: Which? | 11:31:57 11:32:03 11:32:12 11:32:12 11:32:23 11:32:24 11:32:24 |
| Q. When it comes to the fire that weekend was there one particular person or agency that was responsible for trying to anticipate fire behavior? In other words, what that fire was going to do. A. Which fire? MR. GRANT: Which? Q. So I've heard them referred to as the | 11:31:57 11:32:03 11:32:10 11:32:12 11:32:23 11:32:24 11:32:24 |

| 1 | involved as you look at the span of that event up | 11:42:35 |
|----|---|----------|
| 2 | through the canyon. And of course the forest | 11:42:38 |
| 3 | service and federal partners who were engaged on | 11:42:43 |
| 4 | that scene. | 11:42:47 |
| 5 | I don't recall any the fire service, | 11:42:49 |
| 6 | local fire departments would have been significant | 11:42:53 |
| 7 | in that response also. And local emergency | 11:42:57 |
| 8 | managers. | 11:43:01 |
| 9 | Q. And just so I'm clear, what was your | 11:43:01 |
| 10 | understanding of how downed power lines interfered | 11:43:06 |
| 11 | with ODF's efforts on the evacuation front? | 11:43:10 |
| 12 | A. That evening I was receiving calls | 11:43:14 |
| 13 | regarding the Santiam Canyon and we had downed | 11:43:20 |
| 14 | power lines interrupting evacuations. And I heard | 11:43:25 |
| 15 | we had a fire within the fire camp from downed | 11:43:31 |
| 16 | power lines. The incident management team was | 11:43:34 |
| 17 | actively engaged within Gates fighting emerging | 11:43:37 |
| 18 | fires that firsthand accounts identified related to | 11:43:42 |
| 19 | power line entries. | 11:43:48 |
| 20 | Q. Have you ever, in all your years in fire | 11:43:51 |
| 21 | work, have you encountered a wildfire that caused | 11:43:55 |
| 22 | the evacuation of an incident management team like | 11:43:58 |
| 23 | that? | 11:44:00 |
| 24 | A. Yes. | 11:44:00 |
| 25 | Q. When was that? | 11:44:01 |
| | | Page 73 |

| (RECESS is taken, 12:09 to 12:13 p.m.) | 12:09:48 |
|--|--|
| FURTHER EXAMINATION | 12:09:48 |
| BY MR. DOW: | 12:13:58 |
| Q. Doug, just a few final questions before we | 12:13:58 |
| get you out of here. | 12:14:00 |
| Just want to clear something up between - | 12:14:02 |
| the difference between mandate or direction and a | 12:14:03 |
| request. I think everyone - I want to make sure | 12:14:07 |
| everyone's clear that you agree, we all agree, Nik | 12:14:11 |
| agreed, the PUC agreed, no one from the state | 12:14:14 |
| government had the authority to mandate or direct | 12:14:17 |
| that the utilities de-energize their lines on | 12:14:21 |
| September 7, 2020; is that right? | 12:14:23 |
| MR. GRANT: Hold on. Are you asking what | 12:14:26 |
| his understanding of everybody else is? | 12:14:29 |
| MR. DOW: Let's keep it clean. | 12:14:31 |
| Q. Is it your understanding that there was not | 12:14:32 |
| authority on that call to mandate or direct that | 12:14:38 |
| the utilities de-energize their power lines? | 12:14:42 |
| A. That is my understanding. | 12:14:47 |
| Q. And that's different than a request or | 12:14:49 |
| asking we would like you to de-energize your power | 12:14:52 |
| lines to avoid power line ignition. Correct? | 12:14:55 |
| A. That is different, yes. | 12:14:59 |
| Q. Okay. And do you agree with your previous | 12:15:00 |
| | Page 91 |
| | BY MR. DOW: Q. Doug, just a few final questions before we get you out of here. Just want to clear something up between - the difference between mandate or direction and a request. I think everyone - I want to make sure everyone's clear that you agree, we all agree, Nik agreed, the PUC agreed, no one from the state government had the authority to mandate or direct that the utilities de-energize their lines on September 7, 2020; is that right? MR. GRANT: Hold on. Are you asking what his understanding of everybody else is? MR. DOW: Let's keep it clean. Q. Is it your understanding that there was not authority on that call to mandate or direct that the utilities de-energize their power lines? A. That is my understanding. Q. And that's different than a request or asking we would like you to de-energize your power lines to avoid power line ignition. Correct? A. That is different, yes. |

| testimon | y, and what Nik told us, that the point of | 12:15:03 |
|-----------|---|----------|
| the call | and the message conveyed to the utilities | 12:15:06 |
| was: He | re's the risk, we'd like you to de-energize | 12:15:09 |
| your pow | er lines to avoid starting these fire | 12:15:13 |
| ignition | s? | 12:15:16 |
| Α. | That's correct. The word I might use is | 12:15:17 |
| advise. | | 12:15:20 |
| Q. | Sure. Okay. So when you did that in the | 12:15:22 |
| call, wh | en you gave that advice or advised, to | 12:15:26 |
| de-energ | ize to avoid the power line ignitions, and | 12:15:31 |
| you got | the responses from the utilities, how did | 12:15:35 |
| you feel | about the posture of their response or the | 12:15:43 |
| tone of | their response in that conversation? | 12:15:46 |
| Α. | I think I used the word earlier | 12:15:50 |
| discoura | ged at the end of the call. And that's how | 12:15:52 |
| I felt o | verall. | 12:15:56 |
| Q. | During the call when the utilities were | 12:16:00 |
| advised | to de-energize their power line to avoid | 12:16:05 |
| power li | ne ignitions, what about the tone of their | 12:16:08 |
| response | caused you to be discouraged? | 12:16:13 |
| Α. | It was a defensive posture is how I would | 12:16:18 |
| describe | it in the conversation with the utilities. | 12:16:23 |
| Q. | Would that include PacifiCorp's | 12:16:27 |
| represent | tatives? | 12:16:29 |
| Α. | Yes. One distinction I would acknowledge | 12:16:32 |
| | | Page 92 |
| | | 1490 72 |

| is I didn't know any of the individuals going into the call and at this time I don't remember who 12:16 exactly questioned what among the utilities; so 12:16 overall I'll answer that yes, the utility posture was defensive. Q. Okay. Would it be fair to say the utilities - aside from the fact that PGE did de-energize in the Mt. Hood area - were not seeming 12:17 to be receptive to de-energizing to avoid power 12:17 line ignitions? A. That's a fair assessment of the phone call, the tone of the phone call; that's how I felt leaving the phone call so that's where I use the word I was discouraged at the end. Q. Okay. Just a few more here. You mention the Gates school fire where the incident command was, and that would be in the Santiam Canyon area. I want to make sure I heard your testimony correctly that the Gates school fire, do you understand that that fire was caused 12:17 | :36 |
|--|-----|
| exactly questioned what among the utilities; so overall I'll answer that yes, the utility posture was defensive. Q. Okay. Would it be fair to say the utilities - aside from the fact that PGE did de-energize in the Mt. Hood area - were not seeming to be receptive to de-energizing to avoid power line ignitions? A. That's a fair assessment of the phone call, the tone of the phone call; that's how I felt leaving the phone call so that's where I use the word I was discouraged at the end. Q. Okay. Just a few more here. You mention the Gates school fire where the incident command was, and that would be in the Santiam Canyon area. | overall I'll answer that yes, the utility posture was defensive. Q. Okay. Would it be fair to say the utilities - aside from the fact that PGE did de-energize in the Mt. Hood area - were not seeming to be receptive to de-energizing to avoid power line ignitions? A. That's a fair assessment of the phone call, the tone of the phone call; that's how I felt leaving the phone call so that's where I use the vord I was discouraged at the end. Q. Okay. Just a few more here. You mention the Gates school fire where the incident command was, and that would be in the Santiam Canyon area. I want to make sure I heard your testimony correctly that the Gates school 12:17 | :41 |
| was defensive. Q. Okay. Would it be fair to say the utilities - aside from the fact that PGE did de-energize in the Mt. Hood area - were not seeming to be receptive to de-energizing to avoid power line ignitions? A. That's a fair assessment of the phone call, the tone of the phone call; that's how I felt leaving the phone call so that's where I use the word I was discouraged at the end. Q. Okay. Just a few more here. You mention the Gates school fire where the incident command was, and that would be in the Santiam Canyon area. I want to make sure I heard your testimony correctly that the Gates school 12:17 | :50 |
| Q. Okay. Would it be fair to say the 12:16 Attilities - aside from the fact that PGE did 12:17 Re-energize in the Mt. Hood area - were not seeming 12:17 To be receptive to de-energizing to avoid power 12:17 A. That's a fair assessment of the phone 12:17 The tall, the tone of the phone call; that's how I felt 12:17 Reaving the phone call so that's where I use the 12:17 Ford I was discouraged at the end. 12:17 Q. Okay. Just a few more here. 12:17 You mention the Gates school fire where the 12:17 Ancident command was, and that would be in the 12:17 Santiam Canyon area. I want to make sure I heard 12:17 Four testimony correctly that the Gates school 12:17 | :55 |
| de-energize in the Mt. Hood area - were not seeming 12:17 to be receptive to de-energizing to avoid power 12:17 Line ignitions? 12:17 A. That's a fair assessment of the phone 12:17 teall, the tone of the phone call; that's how I felt 12:17 Leaving the phone call so that's where I use the 12:17 word I was discouraged at the end. 12:17 Q. Okay. Just a few more here. 12:17 Incident command was, and that would be in the 12:17 Santiam Canyon area. I want to make sure I heard 12:17 Tour testimony correctly that the Gates school 12:17 | :58 |
| de-energize in the Mt. Hood area - were not seeming 12:17 to be receptive to de-energizing to avoid power 12:17 line ignitions? 12:17 A. That's a fair assessment of the phone 12:17 call, the tone of the phone call; that's how I felt 12:17 leaving the phone call so that's where I use the 12:17 word I was discouraged at the end. 12:17 Q. Okay. Just a few more here. 12:17 You mention the Gates school fire where the 12:17 incident command was, and that would be in the 12:17 Santiam Canyon area. I want to make sure I heard 12:17 your testimony correctly that the Gates school 12:17 | :59 |
| co be receptive to de-energizing to avoid power 12:17 A. That's a fair assessment of the phone 12:17 2:17 2:18 2:19 2:19 2:19 3:11 3:11 4. That's a fair assessment of the phone 12:17 3:10 3:11 4. That's a fair assessment of the phone 12:17 3:10 3:10 4:11 4:11 5:11 5:12 5:12 5:13 6 | :02 |
| A. That's a fair assessment of the phone 12:17 call, the tone of the phone call; that's how I felt 12:17 leaving the phone call so that's where I use the 12:17 word I was discouraged at the end. 12:17 Q. Okay. Just a few more here. 12:17 You mention the Gates school fire where the 12:17 incident command was, and that would be in the 12:17 Santiam Canyon area. I want to make sure I heard 12:17 your testimony correctly that the Gates school 12:17 | :05 |
| A. That's a fair assessment of the phone 12:17 call, the tone of the phone call; that's how I felt 12:17 leaving the phone call so that's where I use the 12:17 word I was discouraged at the end. 12:17 Q. Okay. Just a few more here. 12:17 You mention the Gates school fire where the 12:17 incident command was, and that would be in the 12:17 Santiam Canyon area. I want to make sure I heard 12:17 your testimony correctly that the Gates school 12:17 | :11 |
| call, the tone of the phone call; that's how I felt 12:17 leaving the phone call so that's where I use the 12:17 word I was discouraged at the end. 12:17 Q. Okay. Just a few more here. 12:17 You mention the Gates school fire where the 12:17 incident command was, and that would be in the 12:17 Santiam Canyon area. I want to make sure I heard 12:17 your testimony correctly that the Gates school 12:17 | :14 |
| leaving the phone call so that's where I use the 12:17 word I was discouraged at the end. 12:17 Q. Okay. Just a few more here. 12:17 You mention the Gates school fire where the 12:17 incident command was, and that would be in the 12:17 Santiam Canyon area. | word I was discouraged at the end. 12:17 Q. Okay. Just a few more here. 12:17 You mention the Gates school fire where the 12:17 incident command was, and that would be in the 12:17 Santiam Canyon area. I want to make sure I heard 12:17 your testimony correctly that the Gates school 12:17 | :20 |
| Q. Okay. Just a few more here. 12:17 You mention the Gates school fire where the 12:17 incident command was, and that would be in the 12:17 Santiam Canyon area. I want to make sure I heard 12:17 your testimony correctly that the Gates school 12:17 | :24 |
| You mention the Gates school fire where the 12:17 incident command was, and that would be in the 12:17 Santiam Canyon area. I want to make sure I heard 12:17 your testimony correctly that the Gates school 12:17 | :26 |
| incident command was, and that would be in the 12:17 Santiam Canyon area. I want to make sure I heard 12:17 your testimony correctly that the Gates school 12:17 | :28 |
| Santiam Canyon area. I want to make sure I heard 12:17 your testimony correctly that the Gates school 12:17 | :35 |
| your testimony correctly that the Gates school 12:17 | :40 |
| | :44 |
| fire, do you understand that that fire was caused 12:17 | :46 |
| | :50 |
| by a power line that came down? | :52 |
| A. We had firsthand witnesses that identifies 12:17 | :58 |
| trees and power lines that ignited fires within the 12:18 | :04 |
| incident management camp at Gates and that my 12:18 | :10 |
| understanding is that would be members of the 12:18 | :15 |
| Page 9 | 93 |

| incident | command team assigned on that fire that | 12:18:17 |
|----------|---|----------|
| evening. | | 12:18:21 |
| Q. | And would it be fair to say that that would | 12:18:22 |
| be the e | xact type of risk that you were warning or | 12:18:25 |
| advising | the utilities of including PacifiCorp on | 12:18:29 |
| that Sep | tember 7 call? | 12:18:33 |
| A. | Absolutely. | 12:18:35 |
| Q. | Okay. In all your years have you ever seen | 12:18:37 |
| an incid | ent command center be evacuated because of | 12:18:42 |
| a power | line-caused fire? Other than the one at | 12:18:46 |
| Gates. | | 12:18:52 |
| | MR. GRANT: Can you | 12:18:54 |
| | MS. ZIAO: Objection; assumes facts. | 12:18:56 |
| | MR. GRANT: I guess I'm trying to figure | 12:18:59 |
| out | | 12:19:01 |
| | MR. DOW: Let me rephrase it. | 12:19:01 |
| Q. | You testified earlier you'd seen incident | 12:19:02 |
| command | centers evacuated because fire behavior | 12:19:05 |
| shifts. | Right? Same idea, different question. In | 12:19:07 |
| all thos | e years have you ever seen an incident | 12:19:15 |
| command | center have to be evacuated because a power | 12:19:17 |
| line cam | e down and started a fire in the proximity | 12:19:22 |
| of the i | ncident command center other than the one | 12:19:25 |
| that hap | pened at Gates? | 12:19:27 |
| | MS. ZIAO: Objection; assumes facts. | 12:19:29 |
| | | Page 94 |

| 1 | already had my turn. I'll wait. | 12:20:56 |
|----|---|----------|
| 2 | MR. BERNE: Michael, I was just going to | 12:21:02 |
| 3 | let you know that the plaintiffs in the James case | 12:21:03 |
| 4 | don't have any questions at this time. | 12:21:05 |
| 5 | MR. GRANT: Thank you, Mr. Berne. | 12:21:07 |
| 6 | MS. ZIAO: Okay. So I guess it's just me | 12:21:08 |
| 7 | again. Sorry. | 12:21:11 |
| 8 | FURTHER EXAMINATION | 12:21:11 |
| 9 | BY MS. ZIAO: | 12:21:11 |
| 10 | Q. I just have one or two more questions just | 12:21:13 |
| 11 | about your earlier testimony just now about the | 12:21:16 |
| 12 | September 7 evening call with the governor's office | 12:21:19 |
| 13 | and the various utilities. | 12:21:23 |
| 14 | So I know you had this back and forth about | 12:21:26 |
| 15 | the difference between request versus advice and I | 12:21:28 |
| 16 | just want to again better understand what was | 12:21:33 |
| 17 | actually said on the call. Did Mr. Blosser or you | 12:21:37 |
| 18 | or anyone else in the call actually tell the | 12:21:40 |
| 19 | utilities to please de-energize your power lines to | 12:21:46 |
| 20 | avoid starting fires? | 12:21:52 |
| 21 | A. I don't remember those exact words. But | 12:21:56 |
| 22 | the tone of the call was to inform the utilities | 12:22:00 |
| 23 | that that potential is there and we're faced with | 12:22:06 |
| 24 | that risk and high potential over the next 72 | 12:22:11 |
| 25 | hours. And at the end of the call I didn't see a | 12:22:14 |
| | | Page 96 |

| 1 | pathway based on the conversation that that was | 12:22:23 |
|----|---|----------|
| 2 | that that counsel, that advice was going to lead | 12:22:29 |
| 3 | immediately to action. But I don't recall anyone | 12:22:35 |
| 4 | stating exactly directing directing the | 12:22:40 |
| 5 | utilities to shut power off. | 12:22:45 |
| 6 | Q. Okay. Just to be clear, do you recall if | 12:22:49 |
| 7 | anyone on the call said: Hey utilities, we're | 12:22:52 |
| 8 | advising you to shut off the power to avoid | 12:22:56 |
| 9 | starting fires? | 12:23:00 |
| 10 | A. That would have been the purpose of my | 12:23:01 |
| 11 | briefing, to leave no misconception out there that | 12:23:04 |
| 12 | there is a high potential for power line related | 12:23:15 |
| 13 | fires on the landscape over the next 72 hours. | 12:23:22 |
| 14 | That was clearly understood based on my briefing. | 12:23:28 |
| 15 | Q. Okay. And I'm sorry to keep pressing this | 12:23:32 |
| 16 | but did you did you use the words, I'm advising | 12:23:35 |
| 17 | the utilities to de-energize the power lines? | 12:23:40 |
| 18 | A. I don't recall stating that specifically. | 12:23:45 |
| 19 | Q. Okay. I just want to briefly touch on | 12:23:49 |
| 20 | this. I believe you were questioned about whether | 12:23:54 |
| 21 | the utilities seemed to be receptive to the idea of | 12:23:57 |
| 22 | public safety power shutoffs. Is that your | 12:24:02 |
| 23 | recollection? | 12:24:04 |
| 24 | A. Can you provide more context there? | 12:24:07 |
| 25 | Q. Yeah. I was just referring to the | 12:24:10 |
| | | Page 97 |
| | | |

| 100 | | |
|-----|---|----------|
| 1 | questioning before me right now. I believe you had | 12:24:13 |
| 2 | a short back-and-forth about whether the utilities | 12:24:17 |
| 3 | were receptive to the idea of public safety power | 12:24:21 |
| 4 | shutoffs; do you recall being asked that by | 12:24:25 |
| 5 | Mr. Dow? | 12:24:29 |
| 6 | A. Yes. | 12:24:32 |
| 7 | Q. And I guess I'm just trying to understand, | 12:24:34 |
| 8 | because previously you testified, and correct me if | 12:24:40 |
| 9 | I'm wrong, that after your briefing, the utility | 12:24:43 |
| 10 | representatives asked you questions about where is | 12:24:46 |
| 11 | the highest risk, where are fires located. Am I | 12:24:50 |
| 12 | getting your testimony correct? | 12:24:55 |
| 13 | A. Affirmative. | 12:24:57 |
| 14 | Q. Okay. Is it your understanding that those | 12:24:58 |
| 15 | questions demonstrated that the utilities were not | 12:25:03 |
| 16 | receptive to public safety power shutoffs? | 12:25:09 |
| 17 | A. There's a double negative in there. | 12:25:16 |
| 18 | Trying to understand the question. Sorry, could | 12:25:18 |
| 19 | you repeat? | 12:25:23 |
| 20 | Q. Do you have we'll get rid of that | 12:25:23 |
| 21 | question. | 12:25:26 |
| 22 | Do you have an understanding of why or, I | 12:25:26 |
| 23 | guess, how did you interpret these questions from | 12:25:29 |
| 24 | the utility representatives? | 12:25:31 |
| 25 | A. I felt like we were missing the point with | 12:25:39 |
| | | Page 98 |
| | | |

| the questioning. | 12:25:4 |
|---|---------|
| My highest hope would have been that the | 12:25:4 |
| conversation got to a place of how we can be how | 12:25:5 |
| we can evaluate information evaluate those | 12:26:0 |
| decisions. I didn't see any sophistication in the | 12:26:0 |
| thought process by the utilities as to their | 12:26:1 |
| considerations about when or if they would shut | 12:26:1 |
| power off to implement a public safety power | 12:26:2 |
| shutoff. So it lacked sophistication from what I | 12:26:2 |
| gathered. And quickly went to, well, if you don't | 12:26:3 |
| know exactly where these fires are starting or | 12:26:4 |
| where exactly the highest risk how can how does | 12:26:4 |
| that inform my decision whether to make a power | 12:26:5 |
| shutoff or not. We didn't I would have loved | 12:26:5 |
| the conversation to be more sophisticated in an | 12:26:5 |
| evaluation of PSPS. | 12:27:0 |
| Q. Okay. In response to those questions were | 12:27:0 |
| you able to identify here's the area of highest | 12:27:1 |
| risk and here's where I'm advising power to be shut | 12:27:1 |
| off? | 12:27:2 |
| A. I would have highlighted once again that | 12:27:2 |
| the river canyons is where we're going to see the | 12:27:2 |
| greatest wind experience. I would have loved to | 12:27:2 |
| hear: We're evaluating that, we're tracking that, | 12:27:3 |
| we're watching that, there's also other areas we're | 12:27:3 |
| | Page 99 |
| | |

| concerned. But we didn't hear that level of | 12:27:38 |
|---|----------|
| sophistication in the conversation. | 12:27:45 |
| Q. Did any of the utility representatives say | 12:27:48 |
| to you after your briefing we are we're not | 12:27:52 |
| going to do a public safety power shutoff? | 12:27:55 |
| A. No. | 12:27:58 |
| Q. Okay. | 12:28:01 |
| MS. ZIAO: I think that is, again, all I | 12:28:03 |
| have. Hope that's the last time. So thank you for | 12:28:05 |
| your time again and go off camera. | 12:28:07 |
| MR. GRANT: Mr. Dow? | 12:28:10 |
| MR. DOW: Doug, I just have one, hopefully | 12:28:11 |
| just one follow-up here. | 12:28:14 |
| Not to parse this call too much here, but | 12:28:17 |
| the message from you and Mr. Blosser to the | 12:28:20 |
| utilities - this is what's been conveyed earlier, | 12:28:23 |
| just want to get it clear - look, we can't tell | 12:28:28 |
| you, can't make you shut off the power but given | 12:28:30 |
| all these risks we're telling you about, it would | 12:28:32 |
| be prudent to turn off the power to avoid power | 12:28:35 |
| line caused ignition in light of these big risks. | 12:28:37 |
| THE WITNESS: That's a fair assessment on | 12:28:43 |
| the intent of the call and why the call was | 12:28:44 |
| initiated. | 12:28:49 |
| MR. DOW: Is it a fair assessment of what | 12:28:50 |
| | Page 100 |

| was conveyed to the utilities? | 12:28:51 |
|---|----------|
| THE WITNESS: Yes. | 12:28:53 |
| MR. DOW: No further questions. | 12:28:55 |
| MR. GRANT: Anyone else? | 12:29:00 |
| Stephanie? | 12:29:00 |
| MS. ZIAO: Sorry. Just going to stay off | 12:29:05 |
| camera. | 12:29:07 |
| Just one question. Did you or anyone else | 12:29:08 |
| on the call tell the utilities: It is prudent to | 12:29:12 |
| shut off the power at this time? | 12:29:17 |
| THE WITNESS: I think the balance we're | 12:29:21 |
| walking around here is the recognition we didn't | 12:29:26 |
| have that authority and by being direct and firm, I | 12:29:28 |
| didn't feel like I had the authority clearly to | 12:29:37 |
| direct the utility so I was careful in my words. | 12:29:46 |
| So when you ask that question I'm saying I don't | 12:29:49 |
| recall those exact words coming out but the overall | 12:29:52 |
| tone and intent of that meeting was clear, to | 12:29:56 |
| inform decision-makers on shutting off power so | 12:30:00 |
| they can make prudent decisions and balance that | 12:30:07 |
| risk proposition that's before us. | 12:30:11 |
| It was our shot, you know, early in an | 12:30:15 |
| event to take action. And I feel good that we made | 12:30:19 |
| an effort at that. Because 72 hours later that | 12:30:27 |
| opportunity's over, when the wind's done, ignition | 12:30:33 |
| | Page 101 |
